SCHOOL OF MARITIME STUDIES

B.SC MARITIME OPERATIONS

CURRICULUM AND SYLLABUS

(Based on Choice Based Credit System)
This page left intentionally blank
Program Source Outcome

Department of Maritime Operations

B.Sc Maritime Operations

To enable the student to emerge as:

PSO 01: Develop candidates’ understanding, at an advanced level, of professional concepts and techniques in marine operations fields
PSO 02: Has specialized insight in maritime operations and its process
PSO 03: Can apply knowledge to new area related to maritime operations
PSO 04: Develop candidates’ decision-making abilities
PSO 05: Enhance and develop technical skills and knowledge as relevant to the particular marine role of the individual
PSO 06: Enable candidates to lead innovation in marine organisations’ operations and outputs
PSO 07: Enable candidates to manage change and deploy resources in efficient and effective ways
PSO 08: Enable candidates to use their professional skills and knowledge to support the development of the organisational capability of marine operations organisations

This page left intentionally blank
Course Objective:

- Understand the various geographical regions
- Understand the role of different global market
- Understand the different ship types

Course Outcome:

CO 01: To understand the awareness of different map projections – latitude and longitude
CO 02: To understand the role of shipping as arising from derived demand
CO 03: To be aware of major liner routes
CO 04: To be aware of the categorization of cargoes into clean, dirty, chemicals, gas, vegetable oils and juices
CO 05: To understand the difference between voyage and time charter parties and the basic elements of each
CO 06: To be aware of the role of marine insurance and P&I associations
CO 07: To understand the difference between principals and intermediaries
CO 08: Be aware that all classes of intermediaries may be independent businesses or in-house departments of the principal
CO 09: To understand the fundamentals of bookkeeping and corporate accounts
CO 10: understand the concept of limited liability

Syllabus:

UNIT – I COMMERCIAL GEOGRAPHY & INTERNATIONAL TRADE 16

COMMERCIAL GEOGRAPHY

Continents; geographical regions, for example the Far East, Mediterranean, south-east Asia; location of major countries and ports. All the continents, the major centres of which they are comprised and the manner in which they are grouped in geographical regions. The location of major ports, canals and waterways. Oceans of the world and the seas of which they are comprised. The effects of tides, currents, climate and weather. An awareness of different map projections; latitude and longitude.

INTERNATIONAL TRADE

Understand the role of different markets that comprise the global market. Be aware of the difference between absolute and comparative advantage. Understand the role of shipping as arising from derived demand.
UNIT – II CARGOES AND TRADE ROUTES & SHIP TYPES

CARGOES AND TRADE ROUTES

Thoroughly understand the different roles of liners and tramps. In liners, understand the main unitized systems and break-bulk operations. Be aware of major liner routes. Understand the major dry bulk trades and the origins and distribution of principal cargoes. The oil and other liquid trades; understand the origin and distribution of principal cargoes, distinguishing between crude oil and products. Be aware of the categorization of cargoes into clean, dirty, chemicals, gas, vegetable oils and juices.

SHIP TYPES

Thoroughly understand the basic characteristics of bulk carriers etc and the type of trades in which they are used. Understand the main sizes of vessel in each class. Expect to illustrate any answers with simple sketches.

UNIT – III CONTRACTS OF CARRIAGES & LAW OF CARRIAGE

CONTRACTS OF CARRIAGES

Thoroughly understand the basic contracts; charter parties for tramp and tankers; bills of lading for liners. Be aware of the role of the bill of lading under a charter party. Understand the difference between voyage and time charter parties and the basic elements of each.

Understand the three functions of the bill of lading and its role in international trade. Understand the main specialist abbreviations, terms and expressions used in charter parties and bills of lading.

LAW OF CARRIAGE

Understand the duty of care and the nature of tortuous acts outside contracts. Be aware of the way in which international conventions are established and the major conventions relative to shipping. Understand the basic application of Hague/Hague-Visby, Hamburg and Rotterdam Rules, their requirement for seaworthiness and the limitation of carrier liability. Be aware of the differences between these rules. Understand the legal effect of the bill of lading as a document of title and the implication of its role in the delivery of goods. Be aware of the role of marine insurance and P&I associations.
UNIT - IV SHIP REGISTRATION AND CLASSIFICATION & PRACTITIONERS

SHIP REGISTRATION AND CLASSIFICATION

Thoroughly understand the concept of Ship Registration and its flag state.
Understand the difference between registering in the country of beneficial ownership, offshore registry and flag of convenience
Be aware of port state control
Understand the need for classification and the role of classification societies

THE PRACTITIONERS IN SHIPPING BUSINESS

Thoroughly understand the difference between principals and intermediaries.
Understand the role and function:-
Principals - shipowners, charterers, shippers and NVOCs (non-vessel-operating carriers)
Intermediaries - Brokers in dry cargo chartering, tanker chartering, ship sale and purchase Port agents and liner agents and the differences between them Ship managers and freight forwarders. Be aware that all classes of intermediaries may be independent businesses or in-house departments of the principal.

UNIT - V : BASIC ACCOUNTING

Understand the fundamentals of bookkeeping and corporate accounts.
Thoroughly understand the definitions and functions of revenue, cost, profit, capital. Cash flow, interest.
Be aware of the structure of various different types of business entity and understand the concept of limited liability.

Total Hours: 80

Text Books:
1. Introduction to Shipping by Alan Marsh (Publisher: Institute of Chartered Shipbrokers; Revised Edition August 1, 2016)
2. Introduction to Shipping 2nd Edition by Cheong Kwee Thiam (Publisher: LexisNexis Emerging Issues Analysis CLE)
3. Basic Accounting: The Step-by-step course in elementary accountancy (Teach Yourself) by Nishat Azmat and Andy Lymer

Reference Books:
Course Objective:

- Understand the concept of limited liability as applied to the commercial companies
- Understand how companies are organized internally
- Understand the roles of buyers, sellers, brokers and valuers.

Course Outcome:

CO 01: To understand the difference between vertical and horizontal integration
CO 02: To understand the principles of quality assurance (ISO 9000)
CO 03: To be aware of the potential for fraud in connection with letters of credit or false insurance claims
CO 04: To be aware of the possibility of major fraud such as documentation for non-existent cargo, piracy, scuttling
CO 05: To understand how the original interpretation of the term “shipbroker”.
CO 06: To understand the dry cargo chartering and tanker chartering
CO 07: To understand the major trade routes and types of Ships
CO 08: To understand the location and seasons of major natural phenomena affecting sea transportation particularly storms and ice
CO 09: To thoroughly understand the importance of the bill of lading in international trade.
CO 10: Understand the basics of foreign currency transactions including the system of currency hedging.

Syllabus:

UNIT - I: THE SHIPPING BUSINESS ENTITY & SHIPPING BUSINESS SECTORS 16

THE SHIPPING BUSINESS ENTITY

Thoroughly understands the concept of limited liability as applied to commercial companies. Understand the differences between private and public companies, conglomerates and multinationals.

Understand how companies are organized internally.

Understand the manner in which limited companies are financed, the methods of raising capital and the rewards shareholders may expect.

Understand statutory requirements controlling limited companies aimed at protecting those who deal with them.

Be aware of the differences between vertical and horizontal integration

Understand the advantages and disadvantages of being a sole trader or partnership rather than incorporation as a limited company.
Understand the principles of quality assurance (ISO 9001).
Be aware of the organizations that may test for and grant QA certificates.

**SHIPPING BUSINESS SECTOR**
Understand how the original interpretation of the term ‘shipbroker’ has, through the need to specialize, been expanded to encompass all aspects of shipping business.
For each of the following roles students should be able to answer these questions:

a) For whom does the practitioner work?
b) What form of contract is there between that entity and the practitioner?
c) What does the work involve?
d) What types of documentation does the practitioner normally use?
e) How is the practitioner paid?

**UNIT – II BUSINESS ETHICS**
Thoroughly understand that because so much shipping business is arranged by word of mouth, mutual trust is an imperative ingredient. ‘Our word, our bond’ has always been the Institute’s motto.
Understand how practitioners in shipping business may encounter and be in a position to detect or prevent fraud including such things as indentifying forged bills of lading, falsified certificates, and false declarations of cargo.
Be aware of the potential for fraud in connection with letters of credit or false insurance claims.
Understand the danger of misdirection of freight payments or misdelivery of cargo.
Understand that wrongly dating bills of lading is a fraud and that issuing a letter of indemnity in exchange for clean (rather than claused) bills of lading is technically fraud.
Be aware of the possibility of major fraud such as documentation for non-existent cargo, piracy, scuttling.
Understand the importance of knowing the bonafides of one’s principals and trading partners.

**UNIT – III SHIPPING BUSINESS SECTORS**
Understand how the original interpretation of the term “shipbroker” has, through the need to specialise, been expanded to encompass all aspects of shipping business. For each of the following roles students should be able to answer these questions:

a) For whom does the practitioner work?
b) What form of contract is there between that entity and the practitioner?
c) What does the work involve?
d) What types of documentation does the practitioner normally use?
e) How is the practitioner paid?

**Dry Cargo Chartering**

Thoroughly understand the relative positions of charterer and shipowner also the relationship between these principals and the broker(s) involved. Understand how each principal may have its own broker, how these may be “exclusive” appointments or “competitive”.

The position of intermediate brokers. Understand the way in which the international chartering market operates, the various prime centres including London, New York, Hong Kong, Tokyo. Be aware of the continued dominance of the London market and the altered role of the Baltic Exchange in recent years.

Understand the way in which negotiation by the brokers – duly authorised by their respective principals – conduct negotiations leading to a “fixture” Thoroughly understand the principal differences between a voyage charter and a time charter and understand the basic structure of each type of contract.

Be aware of the special role of a bareboat charter.

Understand how brokers are remunerated by a brokerage (commission) based upon the owner’s earnings under the charter concerned.

**Tanker Chartering**

Thoroughly understand the similarities and differences between dry cargo and tanker chartering especially:- The restricted number of players in this specialised field. Be aware of the meaning of such expressions as “oil majors” “traders”.

Understand the manner in which the market is further compartmentalised depending on the commodities including crude, petroleum products, chemicals, gases, vegetable oils etc. and the way each commodity needs a different type of ship.

Understand the way World scale operates in some sectors of the tanker trade and the reasons for its use. Understand those elements in tanker charter parties that are different from dry cargo forms.

**Ship Sale & Purchase**

Thoroughly understand the respective roles of Buyers, Sellers, Brokers and Valuers. Thoroughly understand that the market is divided into the trade in second hand tonnage (the most active sector for brokers), new buildings (the most specialised sector) and demolition (the scrap market).

Understand how negotiations proceed and the limited number of specialised forms covering the sale.

---

**UNIT – III GEOGRAPHY OF TRADE**

Understand the major trade routes and the types of ships used for transportation of the five
primary raw materials namely coal, ores, grains, fertilizers and oil also general cargo (manufactured goods) with names and locations of the principal ports involved.
Be aware of any particular characteristics and/or hazards involved in the transport these commodities.
Understand the factors that influence the choice of the most favoured transport modes for these commodities e.g. palletisation, unitisation, containerisation, refrigeration, multi-modal transport and be aware of the shore-side facilities and infrastructure needed.
Understand the location and seasons of major natural phenomena affecting sea transportation particularly storms and ice.
Be aware of the rationale behind Loadline Zones and how knowledge of these can affect voyage planning and estimating.

UNIT – V INTERNATIONAL TRADE AND FINANCE

Thoroughly understand the role and function of INCOTERMS in international trade. Understand the manner in which the obligations and insurable risk and title pass from buyer to seller under each of the terms.

Thoroughly understand the importance of the bill of lading in international trade.

Understand the difference between port/port, through and combined transport B/Ls also the role of Waybills.

Understand the various methods of payment that may be used in international trade including cash and bills of exchange.

Thoroughly understand the special place of Documentary Letters of Credit and how they are established and operate. Be aware of ICC Uniform Custom and Practice.

Understand the manner in which countries regulate imports and exports by means of customs tariffs, licensing etc.

Understand the basics of foreign currency transactions including the system of currency hedging.

Understand the importance of collecting, holding and remitting freight, hire and other funds to principals and clients. Be aware of the system of freight hedging.

Total: 80 Hrs

Text Books:
1. The Business of Shipping by James Buckley
2. Legal Principles in Shipping Business 2016 by Sir David Steel, ICS
Course Objective:

- Throughout the syllabus, students should be able to relate the theory to empirical evidence.
- This syllabus does not require an understanding of statistical techniques or methods

Course Outcomes:

CC 01: To understand the basic definition of economics and maritime economics

CC 02: To understand the distinction between the micro economic theory of shipping and macro economic factors affecting international trade

CC 03: To thoroughly understand the factors influencing the supply of shipping — tonnage, number and flag.

CC 04: To be aware of the relationship between costs and quality

CC 05: To thoroughly understand the dry cargo market structure and characteristics.

CC 06: To be aware of the relationship between the tanker and dry markets.

CC 07: To understand pricing behaviour including price discrimination and profitability and the empirical evidence of lower profits than other shipping markets.

CC 08: Be aware of the effect of international regulation.

CC 09: To understand the patterns of world trade; be aware of world trade statistics.

CC 10: To understand the effect of exchange rate fluctuations on shipping.

Syllabus:

UNIT – I
BASIC ECONOMIC CONCEPTS

Understand the basic definitions of economics and maritime economics. Understand the distinction between the micro economic theory of shipping and macro economic factors affecting international trade and shipping and the differences between them.

Thoroughly understand: factors of production, utility and price, opportunity cost.

Thoroughly understand price mechanism and the relationship between demand, price and quantity.

Be aware of competitive models and demand factors.

THE DEMAND FOR SHIPPING

Thoroughly understand how the demand for shipping arises.

Understand the basic measures of economic activity (GNP and GDP)

Thoroughly understand derived demand, elasticity of demand and the relevance of elasticity.
Understand demand measurement — distance, ton/miles and tonnes/kilometres.

UNIT – II
THE SUPPLY OF SHIPPING
Thoroughly understand the factors influencing the supply of shipping — tonnage, number and flag. Understand the trends in development of the world fleet, new buildings and scrapping. Thoroughly understand productivity and supply trends - surplus tonnage, active fleet, market segments. Understand short and long run supply, supply responsiveness and the concept of elasticity.

COST ANALYSIS AND ECONOMIES OF SCALE
Understand basic economic cost concepts - conventional cost analysis in shipping, specific factors affecting the relationship between costs and shipping output. Thoroughly understand economies of scale in shipping and optimal ship size. Understand factors affecting costs including fiscal regimes and flag of registry. Be aware of the relationship between costs and quality. Understand factors affecting costs including fiscal regimes and flag of registry. Understand empirical testing of theory against trends in ship size and the factors involved over the last two decades.

UNIT – III
COMPETITIVE MARKETS—TRAMPS
Thoroughly understand the dry cargo market structure and characteristics. Understand market demand structure and the concept of perfect competition. Understand the use of voyage estimating, breakeven analysis in determining minimum freight rates and the layup decision. Thoroughly understand the cost structure of tramp ships.

COMPETITIVE MARKETS—TANKERS
Thoroughly understand the structure of the tanker market and the seaborne trade in crude and products. Understand the imbalance of ownership, identical service, freedom of entry and exit, full information and segmented supply. Be aware of the relationship between the tanker and dry markets. Understand the effect of political and environmental factors. Thoroughly understand recent changes in the tanker fleet and fluctuations in freight market indices.
UNIT - IV
LINER TRADES— OLIGOPOLY AND THE COMPETITIVE MARKET
Thoroughly understand characteristics and demand for liner services. Understand trends in liner markets and ship types.
Understand pricing behaviour including price discrimination and profitability and the empirical evidence of lower profits than other shipping markets.
Understand the relationship between profit maximization and optimal utilisation.
Understand the role and function of conferences, alliances and consortia and the differences between these structures.
Be aware of the effect of international regulation.
Understand customer demand, the ability to meet customer demand and maximize utilisation.

PORTS, CANALS AND WATERWAYS
Understand the functions of ports, canals and waterways.
Understand the relationship between efficiency and cost and the importance of ship/port time.
Understand investment, criteria and economic factors including cost and tariff structure.
Be aware of arguments for and against public ownership.

UNIT - V
SHIPPING AND INTERNATIONAL TRADE
Understand the patterns of world trade; be aware of world trade statistics.
Understand the demand for shipping.
Understand types of trade flows; inter-industry and intra-industry; absolute and comparative advantage.
Thoroughly understand global trading; the arguments for free trade versus protectionism in its many forms; the role of the World Trade Organisation and G8.

EXCHANGE RATES AND BALANCE OF PAYMENTS
Thoroughly understand how exchange rates are determined; free floating and regulated markets.
Understand the effect of exchange rate fluctuations on shipping.
Understand the components of a balance of payments with particular reference to shipping.
Understand the relationship between exchange rates and the factors affecting their fluctuations and a country's balance of payments.

Total: 80 Hours
Text Books:
1. Economics of Sea Transport and International Trade by John Hoar. Publisher: Institute of Chartered Shipbrokers (1 September 2015)
2. Economics of Maritime Transport, theory and practice, Witherby, 1999

Reference Books:
Course Objectives:

• Able to understand the laws used in shipping business
• Thoroughly understand the precise nature of tort.

Course Outcomes:

CO 01: To be aware of the fact that in many countries case law does not apply as all law is codified.
CO 02: To understand how some breaches may frustrate a contract completely whereas others may require the contract to be fulfilled with compensation for the breach.
CO 03: To thoroughly understand the precise nature of tort.
CO 04: To understand the responsibilities of the principal to the agent.
CO 05: To understand the carriers’ right to be paid freight for the carriage of cargo and his liens for nonpayment.
CO 06: To be aware of the possibility of disputes over final voyage under time charters.
CO 07: To be aware of the customary clauses in bills of lading in respect of carriers and merchants rights and responsibilities.
CO 08: To thoroughly understand the need for an internationally agreed framework of law governing carriage of goods by sea.
CO 09: To thoroughly understand the role of arbitration in dispute resolution.
CO 10: To thoroughly understand the advantages and disadvantages of arbitration v litigation.

Syllabus:

UNIT – I INTRODUCTION TO THE LAW & CONTRACT 16

INTRODUCTION TO THE LAW

English law is the most widely used law in shipping business. Nearly all practical documents of an International nature involved with shipping business are based on English Law, therefore, students must thoroughly understand concepts of common law, case law and precedent and how these contrast with status law (knowledge of specific national statutes is not required).

Be aware of the fact that in many countries case law does not apply as all law is codified.

Be aware of the difference between civil and criminal courts and of their structure, methods of appeal and choice of forum.

CONTRACT

Thoroughly understand the principles of the law of contract especially the essential ingredients of offer, acceptance, consideration and legality.
Understand how and when a contract comes into existence. Understand how a contract may be broken and the circumstances under which it may be voided and how force majeure may prevent its performance.

Understand how some breaches may frustrate a contract completely whereas others may be voided and how force majeure may prevent its performance.

Understand how some breaches may frustrate a contract completely whereas others may require the contract to be fulfilled with compensation for the breach.

UNIT – II TORT & AGENCY

TORT
Thoroughly understand the precise nature of tort.
Understand the specific situation related to the shipping including failure of a duty of care, i.e., negligence and contributory negligence, misrepresentation and vicarious liability outside a contractual situation.
Understand the tort of conversion including delivery of cargo to the wrong path and the tort of defamation.
Be aware the difference between libel and slander

AGENCY
Thoroughly understand general principles of law of agency and how an agency may be created.
Be aware of the difference between general agency, specific agency, and agents of necessity.
Understand the duties and rights of the agent or broker under each type of agency.
Understand the two different forms of authority express and implied.
Understand the responsibilities of the principal to the agent.
Understand the agent’s right to remuneration and the procedures available to ensure payment
Understand the authority of an agent in concluding contracts with third parties on behalf of the principal including the importance of ensuring that the agent’s role is clearly defined.
Thoroughly understand the consequences of breach of warranty of authority. Be aware of the procedures for terminating an agency.

UNIT – III VOYAGE CHARTERPARTIES & TIME CHARTERPARTIES

VOYAGE CHARTERPARTIES
Understand the essential legal difference between voyage charter including consequent voyages and contracts of affreightment, time charters and demise (bareboat) charters.
Thoroughly understand the importance of “time” in charters particularly including the “arrived ship” and laytime.
Understand the carriers’ right to be paid freight for the carriage of cargo and his liens for nonpayment.
TIME CHARTERPARTIES
In time charter thoroughly understands speed and consumption and “off-hire”.
Be aware of the possibility of disputes over final voyage under time charters.
Understand the right of the owner to receive hire for his vessel and remedies in the event of non-payment.

UNIT – IV BILLS OF LADING & LAW AND THE CARRIAGE OF GOODS BY SEA

BILLS OF LADING
Thoroughly understand the role and functions of bills of lading, namely as a receipt (quantity and condition), evidence of a contract (not the contract itself) and as a document of title.
Understand the principal customary clauses in bills of lading including identity of carrier, Himalaya, protection clauses, and clause paramount incorporating one of the international conventions for cargo liability.
Be aware of the customary clauses in bills of lading in respect of carriers and merchants rights and responsibilities.
Thoroughly understand the legal differences between combined transport bills of lading, through bills of lading and port-to-port bills of lading and difference and role of waybills.
Be aware of electronic alternatives to paper bills of lading.
Thoroughly understand the role of bills of lading acts relating to the endorsement and negotiability of the bill of lading as a document of title eg in UK Carriage of goods by sea act (COGSA) 1992.

LAW AND THE CARRIAGE OF GOODS BY SEA
Thoroughly understand the need for an internationally agreed framework of law governing carriage of goods by sea.
Understand the differences between the law involved in private carriage ie charterparties and common carriage ie liner bills of lading.
Thoroughly understand the role and function of international conventions relating to cargo liability.
Thoroughly understand the principle rights, liabilities and exclusion of liability contained in Hague Rules, Hague/Visby Rules and Hamburg Rules and the differences between the three conventions.
Understand the impact of the principle clauses relating the seaworthiness and limitations of liability.
Be aware of other additional rules ie UNCTAD/ICC Combined transport rules Be aware of discussion to revise or replace these conventions.
Be aware of bills of lading problems relating to multimodal transport arising from differing liability regimes applying to individual modes of transport.

UNIT – V COMMON AREAS OF DISPUTE AND DISPUTE RESOLUTION
Thoroughly understand statutes of limitations and time bars and their impact in shipping business.
Be aware of those time bars imposed by statutes or international conventions and those which are
contractually agreed.
Thoroughly understand the role of arbitration in dispute resolution.
Understand the different services provided by maritime arbitrators including short form arbitration and mediation.
Be aware of the main arbitration centres especially London, New York and Paris and their respective maritime arbitration associations.
Thoroughly understand the advantages and disadvantages of arbitration v litigation.
Understand how losses may be recovered (contract).
Understand the remedy against tort feasors and the limitations of compensation that may be obtained.
Be aware of the main areas from which bills of lading disputes arise, title, clean and the clauscd documents, negotiability and liability.

**Total: 80 Hrs**

**Text Books:**
1. Legal Principles in Shipping Business by Institute of Chartered Shipbrokers
Course Objective:

- Able to understand the importance of distribution in international trade
- Able to thoroughly understand the use of the word ‘inventory’ in the context of ‘the goods’ and the importance of inventory management including the need to control inventory costs.

Course Outcome:

CO 01: To thoroughly understand the supply-chain concept and how the different transport modes may be combined.
CO 02: To understand the structural needs and layout of modal interfaces and terminals: depots, warehouses and cargo-handling equipment
CO 03: Thoroughly understand the relative importance of main trade routes including the main container shipping routes, railway routes and land bridges.
CO 04: To understand the relationship between commodities, value and transit time and transport mode.
CO 05: To be aware of the importance of revenue and cash flow.
CO 06: To understand different pricing strategies, contribution or volume (market share) led.
CO 07: To understand the concept of ‘clean’ and ‘dirty’ bills of lading.
CO 08: To understand the use of letters of indemnity, their misuse and the avoidance of fraud.
CO 09: To understand the use of market research and how this can be used in applying marketing techniques.
CO 10: To be aware of different types of sales systems and understand the role of field sales and call centres.

Syllabus:

UNIT – I INTERNATIONAL DISTRIBUTION AND PHYSICAL OPERATION

INTERNATIONAL DISTRIBUTION

Thoroughly understand the importance of distribution in international trade and how basic distribution structures meet international and national needs.

Thoroughly understand the use of the word ‘logistics’ when applied to commercial distribution and understand the role of logistics in the provision of distribution services.

Be aware of the evolution of the global economy in the last quarter of the 20th century arising from unitisation and intermodal transport development.

Thoroughly understand the supply-chain concept and how the different transport modes may be combined.

Understand the importance of modal interfaces and the basic function of ports, airports, inland
depots, railheads etc.

Be aware of the basic intermodal systems: road/rail/sea; sea/air; road/air; road/rail.

Understand the importance of inventory control in operating systems.

**PHYSICAL OPERATION**

Thoroughly understand the characteristics of the main types of primary vehicles and equipment used: ships, trucks, trains and aircraft.

Understand the main variant types of special equipment and facilities used to enhance through transport including swapbodies, double stacks, trailer types, container types.

Understand the structural needs and layout of modal interfaces and terminals: depots, warehouses and cargo-handling equipment.

**UNIT – II TRADE ROUTES AND THE PRACTITIONERS**

**TRADE ROUTES**

Thoroughly understand the relative importance of main trade routes including the main container shipping routes, railway routes and land bridges.

Understand the relationship between commodities, value and transit time and transport mode.

Understand the economic, political and environmental factors arising in respect of road/rail/barge competition and the role of shortsea shipping.

Understand the role of airfreight and its advantages and limitations.

Understand the role of road haulage and the difference between international, domestic trunk and local delivery.

Thoroughly understand the way in which both the transport and logistics of the distribution of many specialist businesses are closely tailored to their needs.

Be aware of, and be able to give examples of, the arrangements made in some representative businesses, for example, hanging garments, bonded goods, perishables, cars, directories.

**THE PRACTITIONERS**

Thoroughly understand the various types of operator involved in multi-modal transportation and the types of service structure they offer, such as liner operators, NVOCs, freight contractors and forwarders, parcel/courier services, railways, international road haulage and airlines.

Be aware of the growing service overlap of, and competition among, the operators. Understand the advantages and disadvantages of public versus private sector ownership; single company versus networks; joint services versus alliances.

Understand the options of internal service provision or outsourcing, and the advantages and disadvantages.
UNIT – III THROUGH TRANSPORT PRICING & INVENTORY MANAGEMENT
THROUGH TRANSPORT PRICING
Thoroughly understand the nature of price competition between transport modes, namely sea versus road/rail versus air. Understand price measurements: tonne-kilometre, and cost-transit time benefit.
Understand the relationship between price and demand.
Be aware of the importance of revenue and cash flow.
Understand different pricing strategies, contribution or volume (market share) led.
Understand the calculation of through transport pricing, the component price/cost components and the concept of price transparency.
Understand how price discrimination is used. Understand the use of distribution and carrier service contracts.

INVENTORY MANAGEMENT
Thoroughly understand the use of the word ‘inventory’ in the context of ‘the goods’ and the importance of inventory management including the need to control inventory costs.
Understand the concepts of just-in-time delivery, and its advantages and disadvantages compared with warehoused stock.
Thoroughly understand the role of supply chain management in optimising inventory.
Understand the use of consolidation and distribution centres; central warehousing versus direct retail delivery.
Be aware of typical supply chain and distribution management systems. Understand how distribution networks are established and used.

UNIT – IV SALE CONTRACTS AND DOCUMENTATION
Understand methods of payment in the sale of goods.
Thoroughly understand the impact of documentary credits and ICC Uniform Customs and Practice on transport documentation.
Understand the different types of contract in the sale of goods including Incoterms.
Thoroughly understand the paramount importance of bills of lading in through transport, their function and their role in international trade.
Understand the effect of bills of lading legislation such as the UK Carriage of Goods by Sea Act 1992 or equivalent national legislation.
Understand the concept of ‘clean’ and ‘dirty’ bills of lading.
Understand the use of letters of indemnity, their misuse and the avoidance of fraud.
Thoroughly understand the different types of bills of lading including ocean, through, combined transport and understand the major and usual clauses including Clause Paramount, Himalaya, identity of carrier and protection clauses.
Understand the importance of endorsements on the back of bills of lading.
Thoroughly understand the difference between bills of lading, waybills and consignment notes and the effect of these on the handover of cargo to receivers.

Understand other transport documentation including booking notes, shipping notes, manifests, dangerous cargo declarations.

**UNIT – V SALES AND MARKETING**

Thoroughly understand the difference between marketing and sales and the importance of both in the multi-modal transport field.

Understand the use of market research and how this can be used in applying marketing techniques.

Be aware of different types of sales systems and understand the role of field sales and call centres.

Understand how customer service levels can be measured and how this relates to the use of quality assurance.

Understand the role of quality management including quality assurance (ISO 9000). Be aware of the concept of total quality management (TQM) and the use of benchmarking.

Thoroughly understand the importance of the role of e-commerce in multi-modal transport and in meeting customers’ perceived needs for supply chain information and transparency

**Total: 80 Hrs**

**Text Books:**
2. Introduction to Global Logistics: Delivering the Goods, Kogan Page

**Reference Books:**
1. Global Logistics for Dummies, Sole – The International Society of Logistics
Course Objective:

- To understand the Shipping company structure
- To understand the commercial operations related to Voyage
- To understand the concept of Crew Management

Course Outcome:

CO 01: To understand the different types of organisation structure from all functions in-house, part contracted or fully contracted out.

CO 02: To thoroughly understand the basics of ship design and construction and the suitability of specific ship types for different cargoes and trades.

CO 03: To be aware of the difference between annual, intermediate, special surveys and damage surveys.

CO 04: To thoroughly understand the requirements for international safety convention certification including Safety of Life at Sea (SOLAS) and loadline certification and appropriate surveys.

CO 05: To understand port disbursements and the role of port agents, including estimated disbursement accounts and advance funds.

CO 06: To understand the calculation and settlement of demurrage and despatch claims.

CO 07: To understand the importance of vessel compliance with contract including speed and performance issues.

CO 08: To be aware of the key players in the bunker market.

CO 09: To thoroughly understand the importance of voyage estimating and its role in ship operating.

CO 10: To understand the mechanics of a voyage estimate including daily operating costs and route calculation

Syllabus:

UNIT – I SHIPPING COMPANY ARCHITECTURE

Shipping Company Structure: Organization of a shipping company – Roles of Commercial, Technical & Crewing departments – In house vs outsourcing of Ship Management functions – Ship Registries, National vs Open Registries – Ship Classification societies
UNIT – II COMMERCIAL OPERATIONS

UNIT – III TECHNICAL MANAGEMENT

UNIT – IV CREW MANAGEMENT

Crew Management: Crew Management – Manning regulations, international conventions viz. STCW, SOLAS – Crew management companies – Maritime training establishments – Maritime Training administration – Port State Control.

UNIT – V SHIP MANAGEMENT CONTRACTS

Total: 80 Hrs

Text Books:

Reference Books:
**Course Objective:**

- Able to understand the Ship Owners Operators & Managers
- Able to understand the principles of marine insurance

**Course Outcome:**

CO 01: To thoroughly understand the reasons for and application of marine insurance in shipping business

CO 02: To understand the role of the International Underwriting Association (IUA) and BRAEMAR (Incorporating the Salvage Association).

CO 03: Thoroughly understand the role and function of the UK Marine Insurance Act, 1906 (as amended).

CO 04: Be aware of the perils covered by the Act

CO 05: Understand how insurance brokers are remunerated by commission.

CO 06: Thoroughly understand the difference between time and voyage policies and use of open cover.

CO 07: Understand the difference between ‘Particular Average’ and ‘Particular Charges’

CO 08: Understand the responsibility of the insured to make efforts to mitigate the loss (sue and labour).

CO 09: Understand the important role of GA within the marine adventure

CO 10: Understand the role and function of the York-Antwerp Rules.

**Syllabus:**

**UNIT – I SHIP OWNERS, OPERATORS & MANAGERS**

**SHIP OWNERS, OPERATORS & MANAGERS**

Thoroughly understand the reasons for and application of marine insurance in shipping business.

Thoroughly understand the division of the market between Lloyds, insurance companies and Protection & Indemnity associations (P&I) and their respective organisational structures.

Be aware of the concept of mutuality in P&I associations. Understand the role and function of an insurance broker.

Understand the different classes of risk covered by marine insurance:

- Hull & Machinery
- Freight & Hire
- War Risk
- Cargo Liability
- Employee Liability

Understand the role and need for professional indemnity insurance (errors and omissions)
Third Party Cover for Transport Operators
Protection & Indemnity
Third Party (including collision, damage to other property, death and personal injury, pollution liability)
Risks and cover available to Professionals service providers [surveyors, brokers; contractual carriers / freight forwarders]
Understand the role of the International Underwriting Association (IUA) and BRAEMAR (Incorporating the Salvage Association).

UNIT – II THE PRINCIPLE OF MARINE INSURANCE
Thoroughly understand the role and function of the UK Marine Insurance Act, 1906 (as amended).
Be aware of the perils covered by the Act.
Thoroughly understand the concept of insurable interest and utmost good faith.
Be aware of the practice of re-insurance.
Understand how the rights and benefits under the contract can be assigned.
Understand how insurable value is determined.
Understand the extent of liability to the insurer both in respect of total and partial loss and how apportionment is made.
Thoroughly understand how the insurer becomes entitled to the insured property (subrogation)
Thoroughly understand the distinction between express and implied warranties and the effect of breach of warranty, and when warranty may be exceeded.
Thoroughly understand the changes brought about by the Insurance Act 2015 to the principles of Marine Insurance.
Thoroughly understand the implied warranty of seaworthiness of the ship.
Understand which losses are covered by the policy and the importance of establishing the proximate clause.
Understand those perils which are excluded from the policy (in particular—misconduct, delay and inherent vice).

UNIT – III THE PRACTICE OF MARINE INSURANCE
Understand the procedures and documentation involved in effecting marine insurance.
Understand the way premiums are assessed and applied.
Understand how insurance brokers are remunerated by commission.
Thoroughly understand the difference between time and voyage policies and use of open cover.
Merger & Ademption of Loss [following the notice of abandonment]
Thoroughly understand the key the Institute (ILU) Clauses as listed:
- Institute Time Clauses Hulls
- Institute Time Clauses – Hulls Total Loss Only
UNIT – IV CLAIMS
Thoroughly understand the concept of total loss, both actual and constructive.
Thoroughly understand the definition of ‘Particular Average’ clearly distinguishing it from General Average.
Understand the difference between ‘Particular Average’ and ‘Particular Charges’
Understand the responsibility of the insured to make efforts to mitigate the loss (sue and labour).
Thoroughly understand the principle of salvage and how salvage services are remunerated.
Thoroughly understand the different ways in which liability may be limited in the case of third party claims against the insured.
Difference between Error and Omissions, and PI Cover
Claim Management: Role of Surveyors [collection of evidence, etc. - to be elaborated]; Role of Average & Loss Adjusters [Overview]
Thoroughly understand the impact of international pollution legislation on marine insurance and how pollution cover is provided.

UNIT – V GENERAL AVERAGE
Thoroughly understand the concept of General Average (GA).
Understand the important role of GA within the marine adventure
Understand the role and function of the York-Antwerp Rules.
Understand the differences between 1994 and 2016 edition of York-Antwerp Rules
Understand what is admissible in a GA settlement.
Understand how GA contributions are covered under marine insurance policies.

Total: 80 Hrs

Text Books:
Course Objective:

- Able to understand the nature of the shipping business
- Able to understand the current status of the ship finance market

Course Outcome:

CO 01: To be aware of the historical context of ship finance (over the past four decades), and the significance of wider economic phenomena in the shipping finance business

CO 02: To understand the legal rights of mortgagees in the event of default by the borrower.

CO 03: To be aware of the rationale of private placements, and the significance of timing.

CO 04: To understand trends of private equity companies investing in the shipping market.

CO 05: To be aware of the functions and characteristics of sinking funds.

CO 06: To thoroughly understand the structure and purposes of convertible bonds.

CO 07: To understand the basic structure of a securitisation, and the role of all participants.

CO 08: To understand the procedural steps in a securitisation.

CO 09: To understand the use of freezing orders previously known as Mareva injunctions.

CO 10: To be aware of the use of LMMA Terms in UK arbitration and SMAA in US arbitration.

Syllabus:

UNIT – I THE NATURE OF THE SHIPPING BUSINESS

THE NATURE OF THE SHIPPING BUSINESS

Thoroughly understand the objectives of lenders and borrowers in the shipping business, including the areas where agreement or consensus is usually achieved and potential areas where there is conflict.

Thoroughly understand the basic features of shipping cycles ‘from boom through to bust’, and the implications of this for the principal participants in the ship-financing decision.

Be aware of the historical context of ship finance (over the past four decades), and the significance of wider economic phenomena in the shipping finance business.

Thoroughly understand the principal sources of security to lenders to shipping companies. Understand, by reference to appropriate case studies, the consequences for both borrowers and lenders, of failing to take into account the phases of the shipping cycle in which the financing decision is made.

THE CURRENT STATUS OF THE SHIP FINANCE MARKET

THE LENDER’S PERSPECTIVE IN THE SHIP FINANCING DECISION

Thoroughly understand the basic principles of good lending, including the importance of proper evaluation of the asset to be financed, the cash flow to be generated, and the significance of ‘name’ or
Thoroughly understand ship mortgages, and their importance as a source of bank security. Understand the legal rights of mortgagees in the event of default by the borrower. Understand case studies in which mortgagee’s rights have been asserted over assets. Be aware of standard terms in a ship mortgage. Be aware of the purpose of ship mortgage indemnities. Understand the purpose and practice of assignment of insurances and earnings as sources of banker’s security in a loan agreement. Understand the purpose and practice of charges or liens over shares, and guarantees from parent companies in respect of loans made to subsidiary companies. Thoroughly understand the crucial importance of value maintenance clauses in ship finance loan agreements. Understand standard terms in the documentation of a guarantee provided by a parent in respect of a loan made by a bank to its subsidiary. Understand banks’ and lenders’ credit risk analysis of borrowers, for example the 6 ‘C’ of credit risk analysis by Grammenos. Be aware of the characteristics and structure of special purpose companies.

UNIT – II EQUITY AS A SOURCE OF FINANCE IN THE SHIPPING BUSINESS

Thoroughly understand the historical reasons why it has been difficult to attract external equity financing into the shipping business. Reasons include the volatility of the sector, the perceived secretiveness of shipowners, the single ship company nature of the business, and international jurisdictional issues, including the ultimate remedy of enforcing a court order for the arrest of a ship. Understand the traditional points of conflict between shipowners and external investors in their companies, and the mechanisms by which these may be resolved. Be aware of the reasons why shipowners may decide to list their shares on more than one international stock exchange. Understand the principal characteristics of the main international stock exchanges on which shipping equity is traditionally listed, including the New York Stock Exchange, the Oslo Bourse and NASDAQ. Thoroughly understand the implications of the US Sarbanes-Oxley Act 2002 for shipping companies looking to list on US stock exchanges. Be aware of the different types of shares which may be issued by shipping companies, and their relative advantages and disadvantages for both issuers and investors, including ordinary shares, partly paid shares, rights issues, cumulative participating preference shares, convertible preferred stock, and participating preferred stock. Be aware of the rationale of private placements, and the significance of timing. Understand trends of private equity companies investing in the shipping market. Understand the principles of public offerings and initial public offerings (IPO).
UNIT – III DEBT FINANCING AND THE BOND MARKETS
Thoroughly understand the differences between debt and equity financing in terms of payment of mandatory interest versus payment of discretionary dividends.
Be aware of some of the different forms bonds may take, and the significance of different payment schedules.
Be aware of the functions and characteristics of sinking funds.
Thoroughly understand the structure and purposes of convertible bonds.
Thoroughly understand the attractions and implications of conversion of convertible bonds from both the shipowner issuer's and investor's perspectives.
Understand the significance of phases of the shipping cycle for the timing of issuance of convertible bonds, and for predicting the likelihood or otherwise of the investor to convert from debt into equity.
Be aware of the principal consequence of conversion of a convertible: the prohibition of reconversion from equity back into debt.
Understand the basic features of convertible bond issues in case studies provided. Understand the use of high yield bonds in shipping finance.

ALTERNATIVE SOURCES OF SHIP FINANCE
Understand the principles and characteristics of shipyard credit as a source of finance.
Understand the principles, structure and purpose of government subsidies.
Understand the role and importance of export credit agencies in ship finance.
Understand the principles, structure and use of leasing-finance and operating.

UNIT – IV TYPES OF LOANS USED IN SHIPPING BUSINESS
Understand the principal objectives of the participants to the loan decision: the shipowner and lender.
Thoroughly understand the characteristics of the different types of loans used in shipping finance, including plain vanilla loans, moratorium loans, bullet repayment loans, balloon repayment loans, back/front-ended loans, and revolving credit facility loans.
Thoroughly understand the rationale for syndicating a loan, and the principal responsibilities of all parties to bond syndications.
Understand the structure and use of mezzanine finance, and its suitability in shipping-finance.

SECURITISATION
Understand the basic objective of securitisation: the bundling together of homogenous cash flows and their use as collateral for a bond issue.
Understand the basic structure of a securitisation, and the role of all participants.
Understand the procedural steps in a securitisation.
Be aware of the objectives of shipowners in securitisations described in the case studies provided.
KS AND KG SHIP FINANCING
Be aware of the German government policy rationale for KG ship-financing. Thoroughly understand a typical KG ship-financing structure.
Understand the principal advantages of KG finance.
Be aware of case studies in which KG financing has been utilised.
Understand the Norwegian KS system of ship finance.
Be aware of the similarities between KG and KS financing.
Thoroughly understand the structure of a typical KS financing. Be aware of new finance products such as baby bonds.

UNIT – V SIGNIFICANCE OF THE DEBT-EQUITY STRUCTURE FOR A SHIPPING COMPANY
Be aware of the history, purposes, and composition of the main international body concerned with the setting of capital adequacy ratios for banks: the Basel Committee.
Understand the effects of the Basel regulations on shipping finance including the significance of the capital adequacy ratio.
Understand the basic composition of the Basel capital adequacy ratio in terms of tiers and asset weighting.
Thoroughly understand that, in the context of shipping-finance, the debt-equity mix is not a static structure.

ISLAMIC FINANCE IN SHIPPING
Thoroughly understand the basic principles of Islamic finance. Understand the characteristics of the principal Shariah-compliant financial instruments found in shipping finance, including Mudharabah, Murabaha, Ijara, and Sukuk.
Be aware of the main components of structures found in the case studies provided.

LEGAL ISSUES IN SHIPPING FINANCE
Ship Registry, corporate veil and one-ship companies
Be aware of the shipownership and registry implications.

MORTGAGE PRIORITIES
Understand that, unlike other aspects of shipowning, mortgages are still covered under English law in many jurisdictions.
Be aware of the main legal issues arising under English mortgage law, namely the difference between a legal mortgage and an equitable mortgage, and understand the consequential difference between registered and unregistered mortgages.
JURISDICTION

Thoroughly understand the rights of those courts dealing with shipping matters to entertain a claim against a ship or other maritime property.

Be aware of the application of awards of costs and how these may vary between jurisdictions.

SHIP LIENS AND SHIP ARREST

Understand the procedure to arrest in rem. Understand the application of the Brussels Arrest Convention 1952 including the types of liens.

Understand the use of freezing orders previously known as Mareva injunctions.

ARBITRATION

Be aware of the main locations for arbitration and the significant differences between their procedures.

Understand the acts and rules governing arbitration.

Be aware of the main terms of the English Arbitration Act (1996).

Be aware of the use of LMMA Terms in UK arbitration and SMAA in US arbitration.

Understand the structure of the English court system and their rules.

Total: 80 Hrs

Text Books:
1. SHIPPING FINANCE THIRD EDITION, STEPHENSON HARWOOD
Port & Terminal Management  5  0  0  5

Course Objective:

- To ensure a thorough knowledge and understanding of port and terminal management
- To develop relevant communication skills

Course Outcome:

CO 01: To understand the role of ports in international trade and transport
CO 02: To understand the special requirements of unitised liner cargoes
CO 03: To understand the basic rationale of port business
CO 04: To understand the prime importance of avoiding traffic and cargo congestion
CO 05: To be aware of the various regulatory mechanisms including user appeals against charges
CO 06: To be aware of laws and regulations relating to the employment of dockworkers
CO 07: To understand flow analysis of cargo in a terminal and environmental factors and constraints
CO 08: To understand the need for a corporate analysis of financial data and for budgetary planning and control
CO 09: To understand the different cargo-handling equipment, types, their costs and the need for maintenance management.
CO 10: To be aware of the transfer of party from state to private ownership, methods of privatisation, sale of shares, management and employee buyouts

Syllabus:

UNIT - I
PORTS AND THEIR FUNCTIONS

Thoroughly understand the role of ports in international trade and transport and how ports can benefit or detract from the economic development of countries and their seaborne trade. Understand the effect of globalisation on port choice and how changes in logistics and distribution patterns influence the development or decline of ports. Be aware of the location of major world ports in liner, dry bulk and liquid trades. Understand the geographic reasons for port location and the extent to which this may depend on the nature of their hinterland and natural resources. Understand the different types of ports and access to ports (natural, man-made, river, estuary) and the diversity of specialist port operations.
Understand the enhanced role of ports in a through transport context – hub ports, feeder/transshipment ports, intermodal interfaces.

Be aware of the role of national, regional and local government in port provision.

Understand the different forms of the ownership structure of ports and of port services; public/private, landlord only, full or part service provider, terminal facilities within ports.

Be aware of the use of free port/free trade zones as an economic tool.

**SHIPS AND CARGOES**

Thoroughly understand the fundamental differences between dry bulk cargo ships, general-purpose ships, liners (container, break-bulk and ro-ro) and tankers, including ore/oil and ore/bulk/oil carriers. Students may be expected to produce sketches.

Understand that tankers subdivide into several categories including carriers for crude oil, petroleum products, chemicals, liquid gases, vegetable oils etc.

Be aware of size ranges of bulk carriers including Capesize, Panamax, handysize. Understand the purpose and basic design and construction features of decks, holds, hatches, derricks, winches, cranes and other cargo-handling gear.

Thoroughly understand the terminology of measuring ships including pseudo-tonnages – NT and GR. Actual tonnages – deadweight (dwat and dwcc) displacement (total and light). Capacities – bale cubic and grain cubic, teu.

Understand what information is contained in stowage plans. Understand how particular ship types are required for the different cargoes and trade routes.

Thoroughly understand the basic characteristics of the main five commodities, namely coal, ore, grain, fertilisers and oil.

Be aware of the different subdivisions within these categories.

Understand the hazards associated with the transport of certain commodities.

Understand the special requirements of unitised liner cargoes.

Understand the main places of origin and appropriate trade routes of other important cargoes plus any seasonal variations.

Have a working knowledge of distances and voyage times.

A good grounding in maritime geography and access to an atlas is essential for this part of the syllabus.

**UNIT - II**

**PORT MANAGEMENT**

Understand the basic rationale of port business.

Thoroughly understand how ports structure the delivery of services and the relationship between infrastructure, conservancy, navigation and handling facilities.
Understand how the activities are organised to interface with one another and typical port organisational structure.

Be aware of the importance of ports being managed as commercial enterprises irrespective of their ownership.

Thoroughly understand how port performance can be measured – vessel turnaround time, cargo volume, speed of cargo handling, damage and pilferage prevention.

Be aware how quality management systems and benchmarking can improve performance.

Understand the responsibility for, and nature of, marine operations – conservancy, dredging, navigation aids, navigation control etc.

Understand the management of cargo operations on board and ashore.

Understand the prime importance of avoiding traffic and cargo congestion.

Thoroughly understand the importance of safety management.

Thoroughly understand the importance of security to prevent terrorism, illegal immigration, theft and smuggling.

Understand the role of trade unions and other labour organisations including ITF. Understand the role of statutory bodies – customs, immigration, port health, marine safety etc. Understand and meet the needs of port users – shipowners and operators, ship agents, forwarders, truckers, rail and barge operations.

Thoroughly understand the information flow requirements of the port, statutory bodies and port users.

Understand how these are met by port community computer systems.

**PORT COMPETITION AND MARKETING**

Understand the nature of port competition, national and international.

Understand the need for market information including trade growth, vessel development, commercial needs and financial viability.

Thoroughly understand the relevance of geographic location to both vessel transit time and port rotation.

Understand the role of shipowners/ship operators, shippers/receivers, freight contractors, forwarders and other transport interests (for example, railways, road hauliers).

Be aware of the various techniques of port promotion and how they assist with identification of potential users.

Understand the impact of inland transportation and inland depot/handling facilities.

Be aware of the scope for collaboration on through transport.
UNIT - III
PORT PRICING
Thoroughly understand both the nature and types of port charges including those incorporating statutory navigational services, services to vessels, services to cargoes.
Understand the cost factors in pricing including for infrastructure, navigation services, equipment, staff and labour, marketing, security and safety, and for environmental services.
Understand pricing policy specifically ‘not for profit’, government influenced, fully commercial.
Understand the effects of competition on pricing policy and how pricing is used as a tool to influence demand.
Understand the various factors used in establishing pricing structures including lengths of time included in base charge for vessels and cargo; units on which charges are based; simplicity of application and transparency; volume rebates.
Be aware of the various regulatory mechanisms including user appeals against charges.
Understand the integration of port charges with charges of other port operators and inland transport organisations and through transport charges.

LEGAL ASPECTS OF PORT MANAGEMENT
Be aware of the nature of port constitutions and the legal framework of ownership.
Be aware of port laws and bylaws, national legislation.
Be aware of the development of port facilities; the financing of port development. Be aware of laws relating to port security, operator’s liability and insurance.
Be aware of laws and regulations relating to the employment of dockworkers.
Be aware of the freedom of port organisations to diversify their activities.
Be aware of development, ownership and control of free ports and free zones.
Be aware of the impact of international conventions on ports.

UNIT - IV
PORT PLANNING
Understand port development policy including the role of government, regional needs and competition
Thoroughly understand planning principles and project planning and the role of traffic forecasts, analysis of demand factors, implications for marketing, involvement of users.
Thoroughly understand capacity calculations and the relationship between berth occupancy, service time and waiting time, and also berth throughput.
Understand the principles behind port layout, physical constraints, terminal planning, specialised terminals, multipurpose terminals and support operations.
Understand the handling characteristics and requirements of break-bulk, neo-bulk, special cargoes,
dry bulk and liquid bulk commodities.
Understand flow analysis of cargo in a terminal and environmental factors and constraints.

PORT FINANCE
Understand the importance of financial management in port operating, specifically budgets, capital and revenue expenditures and investment appraisal.
Be aware of the importance of financial and commercial objectives including the analysis and monitoring of costs and port cost accounting.
Understand the need for a corporate analysis of financial data and for budgetary planning and control.
Be aware of project evaluation and review techniques and capital budgeting and also the financial and economic appraisal of port investment proposals and traffic forecasting.
Be aware of joint venture opportunities for financing or management and policies for both common and sole user terminals.

UNIT – V PORT EQUIPMENT
Understand what is meant by port buildings, transit sheds, warehouses, maintenance workshops, amenity buildings, offices for port users etc.
Understand the different cargo-handling equipment, types, their costs and the need for maintenance management.
Understand how future changes in vessel size and cargo-handling techniques will impact on procurement and materials management.

PORT OWNERSHIP
Be aware of the different types of ownership including national- or local government-owned and managed, other public sector-owned ports and port trusts and the trend towards deregulation of ports.
Be aware of the transfer of party from state to private ownership, methods of privatisation, sale of shares, management and employee buyouts.
Understand what is meant by private sector-owned ports including the different types of ownership, that is, outright, public sector ownership of port infrastructure combined with private sector provision, public ownership of port superstructure with private management and/or operation and the associated issues of lease contracts and joint ventures.

Total: 80 Hrs

Text Books:
1. Port and Terminal Management 2015 – Institute of Chartered Shipbrokers
2. Port and Terminal Management 2013 - Institute of Chartered Shipbrokers
Course Objective:

- This course will expose students to the challenges involved in managing supply chains
- Understand the complexity of inter-firm and intra-firm coordination.

Course Outcome:

C0 01: To understand what is called Supply Chain Management
C0 02: To understand the importance of Supply Chain Management
C0 03: To understand the customer services and channels
C0 04: To know the difference between Purchasing Vs. Procurement
C0 05: To understand Sales and Operations Planning (S&OP) Part I
C0 06: To understand Sales and Operations Planning (S&OP) Part II
C0 07: To understand what is called Forecasting?
C0 08: To understand the Woodmere solution
C0 09: To understand the Advanced and Planning Scheduling
C0 10: To understand the Supply Chain Globalization

Syllabus:

UNIT – I 12
Applied Supply Chain Management
What is Supply Chain Management? - The importance of Supply Chain Management, Matching Supply Chain with products, Supply Chain Value Adds.

Views of Supply Chain Management

UNIT – II 12
Customer Service and Channels
Customer Service, Customer Satisfaction, Channels of Distribution, Services

Business Models and Sourcing
Anticipatory to Response-Based Business Models, Purchasing Vs. Procurement, Procurement Strategies, Building Deep Supplier Relationships
UNIT – III  
**Manufacturing and Integrated Planning**

UNIT – IV  
**Forecasting and Woodmere Case**
Forecasting, Collaborative Planning, Forecasting & Replenishment (CPFR), Woodmere Introduction, Woodmere Solution

UNIT – V  
**Advanced Planning and Scheduling (APS)**

**Supply Chain Globalization**
Rationale and Key Strategies, Requirements and Challenges, Operational Differences, Potential Hidden Costs, Total Cost Strategy

**Total: 60 Hrs**

**Text Books:**

**Reference Books:**
1.  Sourcing and Supply Chain management 5th Edition  (English, Paperback, Robert M. Monczka)

Total: 60 Hrs
Course Objective:

• Able to understand the various parts of a ship
• Able to understand the life saving and fire fighting appliances

Course Outcome:

CO 01: To understand the types of Merchant vessels
CO 02: To understand the types of paint used on ships
CO 03: To understand the types of lifeboat davits and their operational procedure
CO 04: To understand the Outline knowledge of SOLAS 74 and requirements as per SOLAS
CO 05: To understand the description of different types of anchors, parts of an anchor
CO 06: To understand the different types of ropes used for mooring, Use of rat guards
CO 07: To understand the care and maintenance of wire ropes
CO 08: To understand the description of parts of a crane
CO 09: To understand the preparation to be observed to prevent pollution in port and high seas
CO 10: To understand the Responsibilities of employer, Rights and responsibilities of the seafarer

Syllabus:

UNIT – I GENERAL

Names of various parts of a ship, Sea terms, Types of Merchant vessels, Safety apparels as per COSWP.
Preparing metal surfaces – De-scaling and de-rusting, Paints – types of paint used on ships and methods of application, Oils and lubricants, Greasing schedule on ships
Flags and Flag etiquettes – Types of flags, Positions of hoisting flags
Sounding and ullage – Description of Hand lead line, sounding rod and UTI tape.
Speed logs, Bridge / Engine room telegraph, Windlass, Cargo winches – Brief description and its operation.
Riggings – Stage, Bosun’s chair, Pilot ladder, Jacob’s ladder – Brief description and mode of use.

UNIT – II LIFE SAVING / FIRE FIGHTING APPLIANCES

Lifeboat – Description - parts of a lifeboat, types of lifeboats, lifeboat equipment, rations, Types of lifeboat davits and their operational procedure. Launching/boarding procedures.
Life raft – Description of inflatable life rafts, parts, equipment, rations, pyrotechnics, repair of leaks and punctures for inflatable life rafts, launching and boarding procedures.
SART / EPIRB / LTA - Description, features, tests and mode of use.
Personal Protective Equipments – Lifebuoy, Lifejacket, Immersion suit, Thermal protective Aid -
Description, features, tests and mode of use.

Outline knowledge of SOLAS 74 and requirements as per SOLAS for LSA - Survival techniques in survival craft.

Causes and types of fire, the Fire Triangle, principle of firefighting.

Fire fighting appliances – Fire hoses, hydrants, nozzles, ISC, portable fire extinguishers - Description, features, tests and mode of use.

Safety devices – Fireman’s outfit – Personal appliances, breathing apparatus, life line - Description, features, tests and mode of use, checks and maintenance.

Outline knowledge of SOLAS 74 requirements for FFA

Procedures for fighting coal fires, paint fires.

UNIT – III ANCHORS AND ANCHORING PROCEDURES / MOORINGS / DRY DOCKING

Description of different types of anchors, parts of an anchor

Description of anchor cables, joining shackles, Markings of the anchor cables.

Forecastle deck arrangement – hawse pipe, Spurling pipe, chain locker, gypsy

Anchoring procedure – basic, running moor, standing moor, open moor.

Foul anchor / Foul hawse conditions Description and remedial measures.

Hanging off an anchor / slipping the cable – Procedures.

Different types of ropes used for mooring, Use of rat guards.

Securing ropes on bitts, Use of rope and chain stoppers.

Use of heaving line and messenger lines.

General preparation for dry – docking of a vessel.

Bottom cleaning and painting procedure in dry – dock. Modern systems for cleaning, Blasting, water washing of hull bottom.

Re – floating procedure.

UNIT – IV ROPES & WIRES / DERRICKS AND CRANES / CARGO APPLIANCES

Fibre ropes – natural and synthetic fibres, types of lay and their advantages. Care and maintenance of fibre ropes.

Steel wire ropes - construction of wire ropes, explanation of wire core and fibre core, factors determining flexibility. Care and maintenance of wire ropes.

Size – Measuring size of various ropes, wires and chains, tools and methods used.

Blocks – types / parts / size of blocks, Relation between sheave diameter and rope diameter. Care and maintenance of blocks.

Tackles – names of types of tackles and purchases used on ships. Parts of a tackle, usage to advantage and disadvantage, Calculation of size of rope / wire to be used on a particular tackle
for a given load.

Cargo appliances – Shackles, cargo hooks, turnbuckles, slings – types and usage.
Parts of a derrick, Types of rigging – Swinging derricks, Union purchase.
Heavy lift derricks – Jumbo, Stulcken derricks – Description and operation.
Description of parts of a crane. Description of various types of cranes.
Basic knowledge of loading and unloading on general cargo ships and tankers.

UNIT – V SHIP MANEUVERING / POLLUTION PREVENTION & DAMAGE CONTROL / RPSL

Motion of a vessel at sea – rolling, pitching, heaving, panting, pounding and Corkscrewing.
Motion of a vessel at anchor or alongside a berth – heeling, listing, surging, yawing and heaving.
Effect of rudder – Turning circles, Effect of propeller – transverse thrust,
Crash stop distance. Shallow water effects.
Berthing and Unberthing operations. Williamson’s turn and other maneuvers.

Planned Maintenance System
Contingency plans for response to emergencies - Actions to be taken on stranding, collision, grounding.
Preparation to be observed to prevent pollution in port and high seas.
Anti – pollution equipment – Deployment and characteristics on various ships, SOPEP – precautionary preventions, Oil record book.
Recruitment and placement rules 2005, Introduction & definitions - Purpose of the rule, Benefit to seafarers under the rule
Responsibilities of employer, Rights and responsibilities of the seafarer

SMCP. / Safety committee meetings.

Total: 60 Hrs

Text Books:
1. Seamanship Primer Capt. V.K.Bhandarkar
2. Seamanship notes Kemp and young

Reference Books:
1. Survival in life boat and life raft,Capt. S.K.Puri
2. Nicholl’s seamanship and nautical knowledge, A.N.Cockcroft
3. Consolidated edition SOLAS, SOLAS
4. Theory and practice of seamanship, Graham Danton
5. Survival at sea, C.H.Wright
6. Cargo work, Kemp and young
ABILITY ENHANCEMENT COMPULSORY COURSES
Course Objective:

- The main objective is to enhance communication ability of the students in business and professional setup
- This course specifies on how to write smart business correspondence, communicate and handle variant strategies to tackle competition.

Course Outcome:

CO 01: The student learns how to handle different types of business situations.
CO 02: The course helps the students to develop communication skills for a range of business situations- meetings and interviews.
CO 03: It helps the students to polish and perfect their presentation skills.
CO 04: By learning specialist vocabulary and terminologies they are equipped with interpersonal skills.
CO 05: They further learn grammar basics which improves their daily conversation and etiquettes of the language.
CO 06: Students also learn presentation skills and practical knowledge on discussions and interviews.
CO 07: By learning Remedial grammar they become more proficient in using the language in both personal and professional conversations.
CO 08: Students learn the fundamentals of formal writing which will help them to write reports, Agenda, Minutes, Notices, Writing of CV, Memo, Drafting an E-mail.
CO 09: All together this course helps the student be equipped with etiquettes to become a complete professional.

Syllabus:

UNIT – I ORAL COMMUNICATION

UNIT – II COMMUNICATIVE GRAMMER

Auxiliary Verbs, Phrasal Verbs, Modal Verbs.
Verb Phrases and Compliments.
Time and Tense, Regular and Irregular Verbs.
Articles – Indefinite, Definite and Zero Articles.

UNIT – III REMEDIAL GRAMMAR
Adverbs: Types of Adverbs and Adverb Phrases.
Preposition – Preposition of Time, Place and Direction.
Use of Prepositions after Verbs, Adjectives and Noun Phrase.

UNIT – IV WRITTEN COMMUNICATION AND LISTENING
Effective Writing Skills: Elements of Effective Writing, Main Forms of Written Communication:
Agenda, Minutes, Notices., Drafting an E-mail,
Correspondence: Personal, Official and Business, Report Writing.
The Process of Listening, Barriers to Listening, Types of Listening.

UNIT – V SKILLS
Presentation Skills, Public Speaking, Preparing the Speech,
Organising the Speech,
Special Occasion Speeches,
Situational Conversation, Welcome address and Farewell Address.

TOTAL: 60 Hrs

Text Books:

Reference Books:
2. Collins Cobuild, English Grammar.
3. Murphy, Essential English Grammar.
5. Tikku and Shasikumar, Writing with a purpose, OUP.
7. Sasikumar and Dhamija, Spoken English, Delhi: Tata McGraw.
Course Objective:

- To understand the concepts of ratio, proportion and percentage.
- To understand the concept and application of profit and loss in business. To use the concept of EMI.
- To understand the concept of stock exchange and to calculate Dividend.
- To understand applications of matrices in business.

Course Outcome:

CO 01: To understand the Continued Ratio and Inverse Ratio
CO 02: To understand the Computations of Percentage
CO 03: To understand the Problems on Commission and Brokerage
CO 04: To understand the Equated Monthly Installments (EMI)
CO 05: To be well aware of the concept of Shares
CO 06: To understand the Stock Exchange
CO 07: To understand the types of matrices
CO 08: To understand the homogeneous system of linear equations
CO 09: To understand the compounding and discounting of a sum using different types of rates
CO 10: To understand the types of annuities

Syllabus:

UNIT – I RATIO, PROPORTION AND PERCENTAGE

Ratio - Definition, Continued Ratio, Inverse Ratio, Proportion, Continued Proportion, Direct Proportion, Inverse Proportion, Variation, Inverse Variation, Joint Variation, Percentage Meaning and Computations of Percentages.

UNIT – II PROFIT AND LOSS & INTEREST

Profit and Loss

Interest

Simple Interest, Compound interest (reducing balance & Flat Interest rate of interest), Equated Monthly Installments(EMI), Problems
UNIT – III SHARES AND DIVIDENDS
Concept of Shares, Stock exchange, Face Value, Market Value, Dividend, Equity Shares, Preferential Shares, Bonus Shares, Examples.

UNIT – IV MATRICES AND DETERMINANTS
Multivariable data, Definition of a Matrix, Types of Matrices, Algebra of Matrices, Determinants, Adjoint of a Matrix, Inverse of a Matrix via adjoint Matrix, Homogeneous System of Linear equations, Condition for Uniqueness for the homogeneous system, Solution of Non-homogeneous System of Linear equations (not more than three variables). Condition for existence and uniqueness of solution, Solution using inverse of the coefficient matrix, Problems.

UNIT – V MATHEMATICS OF FINANCE
Rates of interest-nominal, effective – and their inter-relationships in different compounding situations.
Compounding and discounting of a sum using different types of rates.
Types of annuities, like ordinary, due, deferred, continuous, perpetual, and their future and present values using different types of rates of interest. Depreciation of Assets. Valuation of simple loans and debentures. Sinking Fund. (General annuities to be excluded)

Total: 60 Hrs

Text Books:

Reference Books:
Course Objective:

- Able to understand the communication network in an organization
- Able to understand the communication techniques

Course Outcome:

CO 01: To understand the communication network in an organization
CO 02: To understand the communication techniques
CO 03: To understand the Adjectives for communicators
CO 04: To understand how to handle crisis and crisis management
CO 05: To understand the Discussion on communication, marketing strategies and branding
CO 06: To understand the global networking
CO 07: To understand the dealing with communication breakdown
CO 08: To understand how to writing a report summarising problems

Syllabus:

UNIT – I COMMUNICATION
Communication Network in an Organization,
Strategy for Effective Communication,
Barriers to Communication, Essentials of Good Communication,
Communication Techniques - Introduction protocol and meeting people in business.
The importance of politeness in business- structures and expressions of politeness.

UNIT – II GRAMMAR AND VOCABULARY
Adjectives for communicators, Idioms for communications. Compound nouns, Multi-word verbs,
Review of present and past tenses. Passives, Adverbs of degree, Text references, Modal perfect.
Dependant prepositions, Gerunds, Conditionals, Prediction and probability.
Word partnerships, Marketing terminology, Describing relations, Relationships, Collocations, prefixes,
Synonyms, Word forms, Describing risk and assessment, Finance, money and loans, money idioms,
Complaints, Finance and customer complaints, handling crisis and crisis management, Describing mergers and acquisitions.

UNIT – III LISTENING
Listening - a communication expert, a professor of marketing, a chief executive of a marketing training organisation, a business relation manager, a head of global corporate responsibility, MD of a technology development company, motivation from an HR director, MD of an institute on risk management, the author
of organisational and management behaviour, Founder of team building specialist, MD of a private equity firm, professor of ethics and social responsibility.

UNIT – IV SPEAKING 12
Speaking: Discussion on communication, marketing strategies and branding, companies that have relationship with customers, global networking, what constitutes failure and success in business, motivation and burnout, satisfaction and frustration, comparison: which is the better company to work for, discussing risk faced by business, trades of a good manager, management styles, being a team player. Money loans, debts, payments, customer care, likelihood and past mistakes. Active listening, prioritising

UNIT – V SKILLS 12
Dealing with communication breakdown, brainstorming, creating a television commercial, networking, creating an agenda and an action plan, writing a sales letter, negotiating, writing a press release or a letter, cold calling, proposing guidelines and discussing their interpersonal relationships in the work place, writing guidelines, reaching agreement discussing and evaluating risks, writing a report, analysing options and making a recommendation, presentation, selecting candidates, writing a report of recommendations to the board of directors, resolving conflicts, discussing proposals, writing a letter suggesting solutions and or a letter warning an employee of consequences of unexpected contact. Negotiating drafting an agreement, writing a summary of negotiations and indicating how to move forward. Writing a report summarising problems.

Total: 60 Hrs

Text Books:

Reference Books:
2. Collins Cobuild, English Grammar.
3. Murphy, Essential English Grammar.
5. Tikku and Shasikumar, Writing with a purpose, OUP.
7. Sasikumar and Dhamija, Spoken English, Delhi: Tata McGraw.
Course Objective:

- To able to understand need for public awareness on Environmental Science
- To understand the Ecosystems and Environmental Pollutions
- To understand Human Population and the environment

Course Outcome:

CO – 1: To understand, what do you mean by Environmental Science
CO – 2: To be well versed in scope and importance of Environmental Science
CO – 3: To get the need for public awareness
CO – 4: To understand the Natural Resources
CO – 5: To understand the Ecosystems
CO – 6: To understand the Environmental pollution
CO – 7: To understand the social issues and the environment
CO – 8: To understand the Human population and the environment

Syllabus

UNIT – I DEFINITION
a. Definition
b. Scope and importance.
c. Need for public awareness

UNIT – II NATURAL RESOURCES
a. Natural resources
b. Ecosystems

UNIT – III ENVIRONMENTAL POLLUTION
a. Environmental pollution

UNIT – IV SOCIAL ISSUES
a. Social issues and the environment

UNIT – V HUMAN POPULATION
a. Human population and the environment

Total: 40 Hrs

Text Books:
3. Erach Bharucha, “Environmental Studies”, UGC, 2004
Course objective:
1. The module aims at creating interest and awareness about the proliferation of the Information Systems in today’s organizations.
2. This would lead to understanding of categories of MIS: Operations Support System, Management Support System and Office automation system, Functional management system.

Course outcome:
CO 01: It is expected that students are able to understand the usage of Information Systems in management.
CO 02: The students also would understand the activities that are undertaken in acquiring an Information System in an organization.
CO 03: Further the student would be aware of various Information System solutions like ERP, CRM, Data warehouses and the issues in successful implementation of these technology solutions in any organization.
CO 04: Students would be able to understand the usage of MIS in organizations and the constituents of the MIS
CO 05: The student would understand the classifications of MIS, understanding of functional MIS and the different functionalities of these MIS. This would be followed by case study on Knowledge management.
CO 06: This leads understanding relationship between database management and data warehouse approaches, the requirements and applications of data warehouse.
CO 07: It leads to linking MIS to business strategy and the areas in which MIS would lead to strategic advantage in specific functions in management.
CO 08: Provides understanding about emerging MIS technologies like MICR, OCR and E-commerce in enterprise applications.
CO 09: The student is able to understand an MIS in real-life situation, identify the need of MIS, implementation issues in MIS in that organization and future trends in that system.
CO 10: The student is able to understand an Security and Ethical Challenges, Risks of Online , Ethical Responsibility of Business Professionals: Operations
Syllabus:

UNIT – I

UNIT – II

Database and Information Management: Organizing Data in Traditional File Environment – The Database Management Approach – Data warehousing – Data Mining – Database Structures Telecommunication Networks: Business Use of the Internet – Role of Intranets and Extranets – Types of Telecommunication Networks

UNIT – III

UNIT – IV

UNIT - V

Total: 60 Hrs
Text Books:

Reference Books:
Course Objective:

- To enlighten the students about their major functions in export and import processes
- To provide expertise for solving issues related to requirements in EXIM management

Course Outcome:

CO 01: To understand the role of import and export trade in an economy
CO 02: To understand the objectives of EXIM Policy
CO 03: To get thorough knowledge on Export Documentation Procedures
CO 04: To understand the role of Logistics in Exports
CO 05: To understand the Import for industrial use / trading
CO 06: To understand the role of Logistics in Imports
CO 07: To understand the Payments methods in Foreign Trade – Documentary Credit / Letter of Credit
CO 08: To understand the managing payment risks
CO 09: To understand the Roles of Service providers in EXIM transactions
CO 10: To understand the Pest Control Agencies

Syllabus:

UNIT – I FUNDAMENTALS OF IMPORT AND EXPORT

UNIT – II OVERVIEW OF EXPORT AND IMPORT

UNIT – III DOCUMENTATION FRAMEWORK

Import for Industrial use / trading – Import Documentation and Customs Clearance procedures – Types of Imports – Import Licenses – Cargo Insurance – Role of Logistics in Import

UNIT – IV CREDIT AND PAYMENTS

Payments methods in Foreign Trade – Documentary Credit / Letter of Credit – UCP 600 with respect of Shipping Documents and L/C Negotiation – Export / Import financing strategies – Managing
Payment Risks

UNIT – V CUSTOMS CLEARANCE AND AGENCIES

Total: 60 Hrs

Text Books:
3. Director General of Foreign Trade, Foreign Trade Policy and Handbook of Procedures, 2015
Course Objective:
- To understand the concept and essential skill-set for various work fields and its applications.
- To understand your goals from the outset of your project.
- To understand the benefits from using project management skills and techniques.

Course Outcome:
CO 1: To know the principle of project management.
CO 2: To know and apply the process and techniques of project management practice.
CO 3: To know the procedure and key skills in attaining their goals.
CO 4: To know the methodology for applying project management.
CO 5: To know the foundation elements necessary for working in and understanding the discipline of project management.
CO 6: To know the organizational process assets influence the project management.
CO 7: To know the organizational system and use to the successful completion of the project.
CO 8: To know the role of project manager at various organizations.
CO 9: To know the different phases of the project life cycle.
CO 10: To know the independent application area of the project management process.

Syllabus:
UNIT - I INTRODUCTION

1. Introduction
   a. Brief outline of Introduction of Project management Body of Knowledge
   b. Brief history of project management
   c. Foundational elements
   d. Terminologies
   e. The environment in which projects are operated
   f. The standard for Project management.

2. The Role of the Project Manager
   a. Definition of a Project Manager
   b. The Project Manager’s Sphere of Influence.
   c. Project Manager’s Competence
   d. Performing Integration
UNIT – II PROJECT MANAGEMENT

1. Project Planning Process
2. Project Scope Management
   a. Project Scope Management Process
   b. Define Scope
   c. Create WBS.
3. Project Schedule Management
   a. Plan Schedule Management
   b. Define Activities.
4. Project Cost Management
   a. Plan Cost Management
   b. Determining Budgets.

UNIT – III PLANNING PROCESS

1. Project Resource Management
   a. Plan Resource Management
   b. Acquiring, Managing, Developing & controlling the resources.
2. Project Communication Management
   a. Plan Communication Management
   b. Managing and Monitoring Communications.
3. Project Risk Management
   a. Plan Risk Management
   b. Identify, Perform, and Implement, Monitor Risks.
4. Importance of Planning in the Project management Process
   a. Actions required by different security levels
   b. Maintaining Security of the Ship / port interface
   c. Brief outline and contents of Declaration of Security
   d. Reporting Security incidents
   e. Implementation of Security Procedures.

UNIT – IV PROFESSIONAL RESPONSIBILITIES AND ETHICS

1. Ensuring Integrity and Professionalism
2. Enhancing individual competence
3. Interactions with Team members and other persons and officials
4. Tools and Techniques.

UNIT – V MONITORING, CONTROLLING AND CLOSING PROJECT

1. Ensuring Project objective is a successful project.
2. Measuring the progress of the project
3. Understanding the concept of benefits of realization and who takes ownership.
Total: 60 Hrs

Text & Reference Books:
3. PMI 2017, The Standard for Program Management
4. PMI 2014, Implementing Organizational Project Management
6. PMI 2016, Requirements Management; A Practice Guide.
Course Objective:

- To understand the concept of roles and responsibilities concerning maritime security for ship and port industries at the national and international level.
- To understand how to maintain the maritime security conditions set forth.
- To understand the principles of safe management and operation of ships.

Course Outcome:

CO 01: To know maritime security terms, including elements that may relate to piracy and armed robbery
CO 02: To know maintain and supervising the implementation of the security plan.
CO 03: To know the procedure for reporting the security incidents.
CO 04: To know the methodology for security assessments so as to have in place plans and procedures to react to changing security levels.
CO 05: To know security-related contingency plans and the procedures for responding to security threats or breaches of security.
CO 06: To know the forms of security documentation.
CO 07: To know the requirements for testing, calibrating, and maintaining security systems and equipment, particularly whilst at sea.
CO 08: To know how to ensure confidence that adequate and proportionate maritime security measures are in place.
CO 09: To know the purpose of implementation of safe management and operation of ships.
CO 10: To know how to compile and form an harmonized survey of certificates.

Syllabus:

UNIT – I INTRODUCTION

1. Introduction
   - Brief outline of Introduction of ISPS code
   - Security terminologies
   - Security terms
   - Current Security threats and Patterns
   - Ship and port operations and conditions

2. Security Responsibilities
   - Contracting Governments
   - Recognized Security Organizations.
• Seafarers with designated security duties
• Port Facility personnel with designated security duties
• The Company
• The Ship
• The Port Facility
• Other personnel.

3. Maritime Security Policy
• Relevant International conventions, codes & recommendations
• Legal implications of action or non action by security personnel
• Handling sensitive security related information and communications.

UNIT – II SHIP SECURITY ASSESSMENT AND PLANS

1. Ship Security Assessment
• Risk assessment methodology
• Assessment tools
• On-Scene security Survey
• Security assessment documentation

2. Ship Security Plan
• Purpose, content, Implementation and Maintenance & Modification of the Plan
• Handling confidential issues.

3. Threat Identification, Recognition & Response
• Recognition & detection of weapons, dangerous substances and devices.
• Methods of Physical search and non-intrusive inspections.
• Implementing and coordinating searches.
• Recognition on a non- discriminatory basis, of persons.
• Techniques used to circumvent security measures
• Crowd management and control Techniques.

4. Ship Security Actions
• Actions required by different security levels
• Maintaining Security of the Ship / port interface
• Brief outline and contents of Declaration of Security
• Reporting Security incidents
• Implementation of Security Procedures.
UNIT – III SECURITY EQUIPMENTS AND ANTI – PIRACY

1. Security Equipments & systems
   - Brief outline of the various types of security equipments and system onboard.
   - Security equipment and system that may used to prevent and suppress attacks by pirates and armed robbery.

2. Operational and limitations of equipments
   - Risks and benefits of the security equipments onboard.
   - Testing, calibration and maintenance of equipment and Systems.
   - Piracy Awareness and Attack
   - The Release Process
   - Seafarer's Family

UNIT – IV EMERGENCY PREPAREDNESS DRILLS & EXERCISE AND SECURITY ADMINISTRATION

1. Security Drills
2. Contingency Planning
3. Documents and Records
4. Monitoring and control
5. Security Audits and Inspections
6. Reporting Non-conformities
7. Training Requirements.

UNIT – V INTERNATIONAL SAFETY MANAGEMENT CODE

1. Introduction
   - Brief outline of introduction and effect of ISM
   - Outline on Company's Safety Management
   - Regulatory bodies
   - Content of ISM code
   - Terminologies

2. Safety Management System.
   - Safety Management System Format
   - Functional requirements of a SMS
   - Operational safety procedure
   - Hazards Identification Techniques
   - Drills and Exercises
   - Emergency response plans
   - Risk and Quality Management.
- Safety management and Safety Culture

3. Audits and Inspection
   - Audit types
   - Audit cycle
   - Audit stages and Techniques
   - System used in incident analysis
   - Maintenance systems

**Total: 60 Hrs**

**Text Books:**
3. ISM Code (2010)
4. SOLAS Chapter –XI -1
5. ILO – Maritime Labour Convention 2006
6. ILO – Seafarer's Identity Documents Convention
DISCIPLINE SPECIFIC ELECTIVE COURSES
Course Objective:

- To develop and strengthen entrepreneurial quality and motivation in students and to impart basic entrepreneurial skills and understanding to run a business efficiently and effectively.

Course Outcome:

CO 01: To understand the types of Entrepreneur
CO 02: To know the difference between Entrepreneur and Intrapreneur
CO 03: To understand the major motives influencing an Entrepreneur
CO 04: To understand the Entrepreneurship Development Programs
CO 05: To gather information on definition and classification of small enterprises
CO 06: To understand the difference classifications of needs and agencies
CO 07: To understand the various source of finance
CO 08: To understand the management of working capital
CO 09: To understand the sickness in small business
CO 10: To understand the Government Policy for Small Scale Enterprises

Syllabus:

UNIT - I ENTREPRENEURSHIP

UNIT - II MOTIVATION
Major Motives influencing an Entrepreneur – Achievement Motivation Training – Self Rating, Business Games, Thematic Apperception Test – Stress Management – Entrepreneurship Development Programs – Needs, Objectives

UNIT - III BUSINESS
UNIT – IV FINANCE AND ACCOUNTING

UNIT – V SUPPORT TO ENTREPRENEURSHIP

Total: 60 Hrs

Text Books:
1. Entrepreneurial Development, Khanka S.S, S. Chand & Co Ltd

Reference Books:
Course Objective:
- Able to understand the classification of Ships
- Able to understand the different machineries

Course Outcome:
CO 01: To understand the propulsion system
CO 02: To understand the Offshore & Survey Vessels
CO 03: To get knowledge on difference Engines
CO 04: To understand the different types of Cranes and its types
CO 05: To understand the machinery layout for different types of Ships
CO 06: To understand the Auxiliary Support Systems
CO 07: To understand the Bunkering, Engine Starting / Stopping Procedure
CO 08: To understand the Emergency Response – Fire / Flooding in Engine Room
CO 09: Safety Procedures – Working Aloft, Working in Restricted Areas, Enclosed Spaces
CO 10: Risk Assessment Permits Hot / Cold Work

Syllabus:

UNIT – I CLASSIFICATION OF SHIPS
2. Cargo – Bulk Carrier, Container, Tankers – Oil, Gas, Chemical, Ro-Ro, Passenger Vessels.
3. Offshore & Survey Vessels

UNIT – II MACHINERIES
Engine – Two Stroke / Four Stroke, Boilers, Compressor, Pumps, Purifier, Steering Gear, Cranes and its types.

UNIT – III LAYOUT OF MACHINERY SPACES
Machinery Layout for Different Types of Ships – Container, Tanker, Ro-Ro, Passenger Vessel.
Auxiliary Support Systems – Cooling, Lubrication Oil, Sewage, Steam, Ballast, Bilge, Air.
UNIT – IV OPERATIONS

UNIT – V SAFE WORKING PRACTICES
Safety Procedures – Working Aloft, Working in Restricted Areas, Enclosed Spaces
Risk Assessment Permits Hot / Cold Work
Safe Isolation Procedure – Electrical Systems
Pollution Prevention Procedures OWS Operation.

Total: 60 Hrs

Text Books:
Course Objective:

- To able to general Safety and Cleanliness on board, personal Protective Equipment, Risk Assessment, Personal Protective Equipment
- To understand Work Activities and Maintenance

Course Outcome:

CO – 1: To understand the general safety and cleanliness on board
CO – 2: To be well versed in the guidance on main elements of risk assessment
CO – 3: To be well versed the uses and care of Personal protective equipment
CO – 4: To understand the use of helmets and goggles in specific work areas
CO – 5: To understand the safe systems of Work
CO – 6: To know how to use portable ladders
CO – 7: To understand the machinery maintenance
CO – 8: To be well versed in the high voltage systems
CO – 9: To understand the use of safety signs
CO – 10: To understand the International color coding of signs

Syllabus:

UNIT – I GENERAL SAFETY AND CLEANLINEES ON BOARD  

UNIT – II PERSONAL PROTECTIVE EQUIPMENT  

UNIT – III WORK ACTIVITIES  
UNIT – IV MAINTENANCE

UNIT – V USE OF SAFETY SIGNS

TOTAL: 60 Hrs

Text Books:
Course Objective:

- To understand the basic concept of the Global Maritime Distress and Safety System (GMDSS) is that search and rescue authorities ashore, as well as shipping in the immediate vicinity of a ship in distress, will be rapidly alerted to a distress incident so they can assist in a coordinated search and rescue operation with the minimum of delay.

Course Outcome:

CO – 1: To understand the radio communication equipment on board ships
CO – 2: To be well versed the principles of operation and selection of frequencies
CO – 3: To understand VHF/MF/HF DSC Distress alert, sending, receiving and acknowledgement, cancellation of distress message. Distress relay
CO – 4: To understand VHF/MF/HF DSC urgency, safety calls and subsequent R/T traffic
CO – 5: To be well versed in VHF/MF/HF calling and replying frequencies
CO – 6: To understand how to use DSC to establish initial call
CO – 7: To be well versed in MF/HF lifeboat radio
CO – 8: To be well versed in Emergency Position Radio Beacons (EPIRBs).
CO – 9: To understand the Principles and actual applications of Worldwide Navigational Warning System
CO – 10: To understand the Maritime Safety Information (MSI) for basic NAVTEX system concept and NAVAREAs

Syllabus:

UNIT – I INTRODUCTION

Radio communication equipment on board ships – introduction to various equipment, principle of operation, selection of frequencies.
Radio regulations relating to Maritime Services including maritime frequency allocation.
Satellite communication and alerting systems – equipment aboard ship and ashore. Methods of communication used.
Global Maritime Distress and Safety System (GMDSS) – Principles and actual applications.
MERSAR, IAMSAR and AMVER
Inmarsat communication systems – Sat B, Sat C, Sat M and recent development of advanced communication systems. EGC messages
UNIT – II DISTRESS, URGENCY AND SAFETY COMMUNICATIONS

VHF/MF/HF DSC Distress alert, sending, receiving and acknowledgement, cancellation of distress message. Distress relay.
VHF/MF/HF DSC urgency, safety calls and subsequent R/T traffic.
On-scene communication and SAR operations.
R/T Distress subsequent traffic. Urgency and Safety communications.

UNIT – III OPERATIONAL PROCEDURES FOR GENERAL COMMUNICATIONS

VHF/MF/HF calling and replying frequencies.
Using DSC to establish initial call.
Transmission and reception of routine R/T communications.

UNIT – IV SURVIVAL CRAFT RADIO EQUIPMENT

Basic Operational Specifications, Characteristics and Routine Testing:
Portable (immersion proof) VHF radios.
MF/HF lifeboat radio.
Search and Rescue Radar Transponders (SARTs).
Emergency Position Radio Beacons (EPIRBs).

UNIT – V NAVTEX

Worldwide Navigational Warning System - Principles and actual applications.
Maritime Safety Information (MSI) for basic NAVTEX system concept and NAVAREAs.
NAVTEX receiver operational characteristics, set up procedures and message format and use as an aid to safe navigation.

Total: 60 Hrs

TEXT BOOKS:
2. University Handout

REFERENCE BOOKS:
1. GMDSS Handbook - 2007
GENERIC ELECTIVE COURSES
Course Objective:

- Able to understand the fundamental of computer programming language
- Able to understand the compilers and various statements
- Able to understand the designing of Websites using HTML with scripting language

Course Outcome:

CO 01: To understand the Binary and ASCII Statements
CO 02: To thoroughly understand the various statements in Conditions, Loops
CO 03: To understand the Command Line Arguments and Bubble Sort
CO 04: To understand the concept of Dynamic Memory Allocation
CO 05: To understand how to create website pages using HTML
CO 06: To understand the scripting languages
CO 07: To understand the MVC
CO 08: To thoroughly understand the Structured Query Language (SQL)
CO 09: To understand what is called Artificial Intelligence
CO 10: To understand the Exciting Conclusion

Syllabus:

UNIT – I

12

Linux, C, Compiling, Libraries, Types, Standard Outputs
Casting, Imprecision, Switches, Scopes, Strings, Arrays, Cryptography

UNIT – II

12

Command-line arguments, Searching, Sorting, Bubble Sort, Selection Sort, Insertion Sort, Recursion, Merge Sort
Stack, Debugging, File I/O, Hexadecimal. Strings, Pointers, Dynamic Memory Allocation
Heap, Buffer Overflow, Linked Lists, Hash Tables, Trees, Stacks, Queues.
UNIT – III
TCP/IP, HTTP, HTML, CSS, PHP
Java Script, Ajax

UNIT – IV
Model – View – Controller (MVC), Structure Query Language (SQL)

Unit – V
Artificial Intelligence, Exciting conclusion

Total: 60 Hrs

Text Books:
2. The C Programming Language – Brian W. Kernighan, Dennis M. Ritchie, Publisher: Pearson
3. HTML & CSS design and build Websites – Jon Duckett
4. Eloquent Javascript (A Modern Introduction to Programming) - Marijn Haverbeke
5. University Handouts
Course objective

- The purpose is to expose the student to the basic concepts of management in order to aid the student in understanding how organization functions.
- It helps in understanding the complexity and wide variety of issues managers face in today's business firms.
- To gain a solid understanding of human behavior in the workplace from an individual, group, and organizational perspective
- It will provide the frameworks and tools to effectively analyze and approach various organizational situations.
- To understand the organizations HRM practices, HR planning, Training Activities, Compensation and reward Planning, Performance Appraisal systems.
- To understand the programs and packages available in the organization.
- Students acquire knowledge of internal accounting system, cost classification, cost behavior, cost volume profit analysis, budget and variance analysis in decision making.
- To understand the foundations of Finance and financing decisions, Working Capital and Long term sources of finance.
- To understand about Marketing concepts, Marketing Strategies
- To understand about Buyer Behavior, and Marketing Trends.

Course Outcome:

CO 01: It will make the students knowledgeable on the historical, current, and future issues in management.
CO 02: It will make the students to discuss the managerial issues.
CO 03: Students will be able to apply problem solving and critical thinking abilities to analyze the kinds of choices available for developing alternative organizational behavior approaches in the workplace.
CO 04: Students can analyze the personality and change the attitude of the people in the organization.
CO 05: Enhanced Recruitment activities, Better Training and Development programme, Motivated Workforce and reduced Employee Grievances.
CO 06: Students get familiar in taking decision according to the contingency of the environment.
CO 07: Students will be able to apply cost relationship for analysis, use costs in pricing and decision making.
CO 08: Better Portfolio Management, dividend decisions, Inventory management and long term financing decisions.
CO 09: Better formulation of Marketing Strategies, Marketing Mix Decisions

Syllabus:

UNIT – I MANAGERIAL FUNCTION AND PROCESS

Concept and Foundations of Management, Evolution of Management Thoughts; Managerial Functions – Planning, Organizing, Controlling; Decision making; Role of Manager, Managerial skills; Entrepreneurship; Management of innovation; Managing in a global environment, Flexible Systems Management; Social responsibility and managerial ethics; Process and customer orientation; Managerial processes on direct and indirect value chain.

UNIT – II ORGANISATIONAL BEHAVIOUR AND DESIGN

Conceptual model of organization behaviour; The individual processes – personality, values and attitude, perception, motivation, learning and reinforcement, work stress and stress management; The dynamics of organization behaviour – power and politics, conflict and negotiation, leadership process and styles, communication; The Organizational Processes - decision making, job design; Classical, Neoclassical and Contingency approaches to organizational design; Organizational theory and design - organizational culture, managing cultural diversity, learning organization; organizational change and development; Knowledge Based Enterprise – systems and processes; Networked and virtual organizations.

UNIT – III HUMAN RESOURCE MANAGEMENT

HR challenges; HRM functions; The future challenges of HRM; Strategic Management of human resources; Human resource planning; Job analysis; Job evaluation; Recruitment and selection; Training and development; Promotion and transfer; Performance management; Compensation management and benefits; Employee morale and productivity; Management of organizational climate and Industrial relations; Human resources accounting and audit; Human resource information system; International human resource management.

UNIT – IV ACCOUNTING FOR MANAGERS AND FINANCIAL MANAGEMENT

Financial accounting – concept, importance and scope, generally accepted accounting principles, preparation of financial statements with special reference to analysis of a balance sheet and measurement of business income, inventory valuation and depreciation, financial statement analysis, fund flow analysis, the statement of cash flows; Management accounting – concept, need, importance and scope; Cost accounting – records and processes, cost ledger and control accounts, reconciliation and integration between financial and cost accounts; Overhead cost and control, Job and process costing, Budget and budgetary control, Performance budgeting, Zero-base budgeting, relevant costing and costing for decision-making, standard costing and variance analysis, marginal costing and
absorption costing.
Goals of finance function; Concepts of value and return; Valuation of bonds and shares; Management of working capital: Estimation and financing; Management of cash, receivables, inventory and current liabilities; Cost of capital; Capital budgeting; Financial and operating leverage; Design of capital structure: theories and practices; Shareholder value creation: dividend policy, corporate financial policy and strategy, management of corporate distress and restructuring strategy; Capital and money markets: institutions and instruments; Leasing, hire purchase and venture capital; Regulation of capital market; Risk and return: portfolio theory; CAPM; APT; Financial derivatives: option, futures, swap; Recent reforms in financial sector.

UNIT – V MARKETING MANAGEMENT
Concept, evolution and scope; Marketing strategy formulation and components of marketing plan; Segmenting and targeting the market; Positioning and differentiating the market offering; Analyzing competition; Analyzing consumer markets; Industrial buyer behaviour; Market research; Product strategy; Pricing strategies; Designing and managing Marketing channels; Integrated marketing communications; Building customer satisfaction, Value and retention; Services and non-profit marketing; Ethics in marketing; Consumer protection; Internet marketing; Retail management; Customer relationship management; Concept of holistic marketing.

Total: 80 Hrs

Text Books:
Reference Books:
INTRODUCTION TO WEB DESIGNING

Course Objective:

- Able to understand how to design a web sites using HTML, CSS
- Able to understand the Rich Internet Applications

Course Outcome:

CO 01: To understand the History of the Internet and World Wide Web
CO 02: To understand what is called Social Network
CO 03: To understand how to use CSS
CO 04: To thorough knowledge of Inline Styles and Embedded Style Sheets
CO 05: To understand why to use JavaScript
CO 06: To understand the event handlers and event bubbling
CO 07: To get idea about XML basics
CO 08: To understand the DOM needs
CO 09: To understand the Rich Internet Applications
CO 10: To understand how to use Dreamweaver

Syllabus:

UNIT – I
12

UNIT – II
12

UNIT – III
12
Recursion, Arrays – Objects - Math Object - String Object - Date Object, Boolean and Number Objects, document Object, window Object, Cookies. Events- Event Handlers, Event Bubbling

UNIT – IV

UNIT – V
Rich Internet Application: HTTP Transactions, Multi-tier Application Architecture, Client-Side Scripting versus Server-Side Scripting, Accessing Web Servers, Microsoft Internet Information Services (IIS), Apache HTTP Server, PHP - PHP Basics, String Processing and Regular Expressions, Form Processing and Business Logic, Connecting to a Database, Using Cookies, Dynamic Content, Operator Precedence Chart. Flash-CS3, Flex, Dreamweaver

Total: 60 Hrs

Text Books:
Course Objective:
• To facilitate the understanding of Quality Management principles and process.
• Better capture and conversion of the quality needs.

Course Outcome:
CO 01: To know about the basics of TQM.
CO 02: To know the customer focus on TQM
CO 03: To understand the Principles of TQM
CO 04: To learn improvement process in TQM
CO 05: To know about Tools & Techniques
CO 06: To understand about Bench Marking
CO 07: To know the applications of Tools & Techniques
CO 08: To know Improvement needs
CO 09: To understand the concept & regulations of ISO 9000
CO 10: To know about Quality Auditing

Syllabus:

UNIT - I INTRODUCTION

UNIT - II TQM PRINCIPLES
Leadership – Strategic quality planning, Quality Councils – Employee involvement – Motivation, Empowerment, Team and Teamwork, Quality circles Recognition and Reward, Performance appraisal – Continuous process improvement – PDCA cycle, SS, Kaizen – Supplier partnership – Partnering, Supplier selection, Supplier Rating.

UNIT - III TQM TOOLS AND TECHNIQUES I
UNIT – IV TQM TOOLS AND TECHNIQUES II

UNIT – V QUALITY SYSTEMS

Total: 60 Hrs

Text Books:

Reference Books:
### Course Objective:
- To understand the conceptual framework for strategic management
- To understand the Competitive Advantage and Strategies

### Course Outcome:
- CO 01: To understand the concept of Strategy and the Strategy Formation Process
- CO 02: To understand the Corporate Governance and Social Responsibility
- CO 03: To understand the Porter's Five Forces Model
- CO 04: To understand the avoiding failures and sustaining competitive advantage
- CO 05: To understand the Strategic analysis and choices
- CO 06: To understand SWOT Analysis
- CO 07: To understand the designing Strategic Control Systems
- CO 08: To know the techniques of strategic evaluation & control
- CO 09: To Managing Technology and Innovation
- CO 10: To understand the new Business Models and strategies for Internet Economy

### Syllabus:

#### UNIT - I STRATEGY AND PROCESS

#### UNIT - II COMPETITIVE ADVANTAGE

UNIT – III STRATEGIES

UNIT – IV STRATEGY IMPLEMENTATION & EVALUATION

The implementation process, Resource allocation, Designing organisational structure-Designing Strategic Control Systems- Matching structure and control to strategy-Implementing Strategic change-Politics-Power and Conflict-Techniques of strategic evaluation & control-case study.

UNIT – V OTHER STRATEGIC ISSUES

Managing Technology and Innovation-Strategic issues for Non Profit organisations. New Business Models and strategies for Internet Economy-case study

Total: 80 Hours

Text Books:
1. Strategic Management Text and Cases by Jacob Thomas, Pearson Publications
2. Strategic Management from Theory to Practice by Allen Amason, Routledge

Reference Books:
1. It strategy and Management by Dubey S.S by PHI Learning Private Ltd.
Course Objective:

- Be exposed to big data
- Learn the different ways of Data Analysis
- Be familiar with data streams
- Learn the mining and clustering
- Be familiar with the visualization

Course Outcome:

CO 01: To understand the Big Data Platform

CO 02: To understand the evolution of Analytic Scalability, Analytic Processes and tools

CO 03: To understand the regression model

CO 04: To thoroughly understand the Neural Networks

CO 05: To understand the stream data model and architecture

CO 06: To understand the Real time Analytic Platform

CO 07: To get the knowledge on Apriori Algorithm

CO 08: To get the knowledge about CLIQUE and PROCLUS

CO 09: To understand the Framework and Visualization

CO 10: To understand the Visual data analysis and techniques

Syllabus:

UNIT – I INTRODUCTION TO BIG DATA 12

UNIT – II DATA ANALYSIS 12
UNIT – III MINING DATA STREAMS

UNIT – IV FREQUENT ITEMSETS AND CLUSTERING

UNIT – V FRAMEWORKS AND VISUALIZATION
MapReduce – Hadoop, Hive, MapR – Sharding – NoSQL Databases – S3 – Hadoop Distributed file systems – Visualizations – Visual data analysis techniques, interaction techniques; Systems and applications

Total: 60 Hrs

Text Books:

Reference Books:
### Course Objective:
- Able to understand the concept of electronic commerce
- Able to understand how electronic commerce is affecting business enterprises.

### Course Outcome:
- CC 01: To understand the main activities of Electronic Commerce
- CC 02: To understand the functions of Electronic of Electronic Commerce
- CC 03: To gather knowledge on characteristics of Internet
- CC 04: To get knowledge on Internet Service Provider
- CC 05: To understand the data warehousing
- CC 06: To understand the eXtensible Markup Language
- CC 07: To understand the online marketing
- CC 08: To understand the security on the Internet
- CC 09: To understand the E-Payment System
- CC 10: To understand the E-Customer Relationship Management

### Syllabus:

#### UNIT - I INTRODUCTION TO E-COMMERCE

**Introduction to E-Commerce**

Defining Commerce; Main Activities of Electronic Commerce; Benefits of E-Commerce; Broad Goals of Electronic Commerce; Main Components of E-Commerce; Functions of Electronic Commerce – Communication, Process Management, Service Management, Transaction Capabilities; Process of E-Commerce; Types of E-Commerce; Role of Internet and Web in E-Commerce; Technologies Used; E-Commerce Systems; Pre-requisites of E-Commerce; Scope of E-Commerce; E-Business Models.

#### E-COMMERCE ACTIVITIES

Various Activities of E-Commerce; Various Modes of Operation Associated with E-Commerce; Matrix of E-Commerce Types; Elements and Resources Impacting E-Commerce and Changes; Types of E-Commerce Providers and Vendors; Man Power Associated with E-Commerce Activities; Opportunity Development for E-Commerce Stages; Development of E-Commerce Business Case; Components and Factors for the Development of the Business Case; Steps to Design and Develop an E-Commerce Website.
UNIT – II INTERNET – THE BACKBONE FOR E-COMMERCE

INTERNET – THE BACKBONE FOR E-COMMERCE

Early Ages of Internet; Networking Categories; Characteristics of Internet; Components of Internet – Internet Services, Elements of Internet, Uniform Resource Locators, Internet Protocol; Shopping Cart, Cookies and E-Commerce; Web Site Communication; Strategic Capabilities of Internet.

ISP, WWW AND PORTALS

Internet Service Provider (ISP); World Wide Web (WWW); Portals – Steps to build homepage, Metadata; Advantages of Portal; Enterprise Information Portal (EIP).

UNIT – III OPEN SYSTEM INTERCONNECTION

REFERENCE MODELS

XML AND DATA WAREHOUSING

Definition of eXtensible Markup Language (XML); XML Development Goals; Comparison between HTML and XML; Business importance in using XML Based Technology; Advantages, Disadvantages and Applications of XML; Structure of an XML Document; XHTML and X/Secure; Data Warehousing; Data Marts and Operational Data Stores.

UNIT – IV E-MARKETING & E-SECURITY

E-MARKETING

Traditional Marketing; E-Marketing; Identifying Web Presence Goals – Achieving web presence goals, Uniqueness of the web, Meeting the needs of website visitors, Site Adhesion: Content, format and access; Maintaining a Website; Metrics Defining Internet Units of Measurement; Online Marketing; Advantages of Online Marketing.

E-SECURITY

UNIT – V E-PAYMENT SYSTEM & E-CUSTOMER RELATIONSHIP MANAGEMENT

E-PAYMENT SYSTEMS

Electronic Funds Transfer; Digital Token Based E-Payment Systems; Modern Payment Systems; Steps for Electronic Payment; Payment Security; Net Banking.

E-CUSTOMER RELATIONSHIP MANAGEMENT

Customer Relationship Management (CRM) – Marketing automation, Enterprise customer management; Customer Relationship Management Areas; CRM Processes; Architectural Components of a CRM Solution – Customer’s information repository, Campaign management, Event triggers, business logic and rules repository, Decision support tools, Higher level statistical analysis, Forecasting and planning tools, True channel management, Workflow management, Collateral management; Electronic Customer Relationship Management; Need, Architecture and Applications of Electronic CRM.

Total: 60 Hrs

Text Books:
1. Introduction to e-Commerce (McGraw-Hill/Irwin Series in Marketing)
2. Introduction to e-Commerce & ERP, by Adesh K. Pandey. Published By Katson

Reference Books:
1. Concept of e-Commerce, by Adesh K Pandey. Published By Katson
Course Objective:

- Digital Marketing is a Great Platform to acquire Trending Skills.
- The primary intention of digital marketing is increasing the traffic, building brand awareness, reaching the targeted audience, and improving the sales via different online channels. Businesses leverage digital channels such as Google search, social media, email, and their websites to connect with their current and prospective customers.

Course Outcome:

CO 01: To understand the fundamentals of digital marketing.
CO 02: To be well versed in strategic flow for marketing activities.
CO 03: To understand the types of digital marketing.
CO 04: To be well versed in strategies in digital marketing.
CO 05: To understand the concept of E-commerce.
CO 06: To understand the concept of remarketing.
CO 07: To understand the concept of digital marketing mix strategy.
CO 08: To understand digital payment systems.
CO 09: To understand the concept of customer oriented business.
CO 10: To be well versed in ethical and legal issues in digital marketing.

Syllabus:

UNIT – I 12
Digital marketing fundamentals - marketing vs sales - Marketing Mix and 4ps - Inbound vs outbound marketing - content marketing - Understanding leads - Strategic flow for marketing activities.

UNIT – II 14
Website planning and structure - face book marketing fundamentals - Google ad words - Google analytics - audience reports - Traffic Reports - YouTube marketing fundamentals - Mobile marketing - Video Marketing - Email Marketing - Instagram marketing - marketing automation - online reputation management.

UNIT – III 10
UNIT – IV

Digital marketing- Digital marketing plan- Digital marketing mix strategy- Digital Marketing Mix
Decision-Methods and techniques of Digital marketing- Situational analysis- Budget allocation-
Electronic payment system- Electronic cash- smart cards- Electronic data interchange(EDI).

UNIT – V

E- Metrics- Customer oriented business- Consumer demographics- online catalogue- E- customer
relationship management- E-CRM and community building- E-CRM and customer lifecycle- E- CRM
versus E- Loyalty- Legal and Ethical Issues in Digital marketing- Issue in digital marketing- Digital
property.

Total: 60 Hrs

Text Books:
1. The Art of Digital Marketing by Ian Dodson
2. Marketing By Philip Kotler
3. Customer Relationship Management by Subhasish Das
4. Customer Behaviour by G. Schiffman Leon and Kumar S. Ramesh
5. Legal Aspects of Marketing and Sales by Don Mayer

Reference Books:
1. E-Marketing: The Essential Guide to Online Marketing, v. 1.0 by Rob Stokes and the Minds of
   Quirk.
3. The Handbook of Marketing Research: Uses, Misuses, and Future Advances by Grover, Rajiv, and
   Marco Vriens.
SHIP SIMULATOR FAMILIARIZATION

4  0  0  4

Course Objective:

- To identify the list of equipments
- To understand how to use of Bridge equipments, RADAR / ARPA, GPS, Rule 5 Look, Radar Look Out, Watch keeping, Wind Waves, Log Keeping

Course Outcome:

CO – 1: To understand the Radar

CO – 2: To be well versed with Main Engg. Control Panel

CO – 3: To understand the use of Bridge Equipment

CO – 4: To be well versed with Entry in log book after 4 hours navigational watch

CO – 5: To understand the uses of ARPA

CO – 6: To know how to do Receiving a pilot / pilot flags / Entry in movement book

CO – 7: To Understanding / repeating / executing pilots HELM n ENGINE orders

CO – 8: To understand how to avoid collision

Syllabus:

IDENTIFYING LIST OF EQUIPMENTS

1. Clocks synchronise / E/R status to be manned / Terms FWE, SBE, RFA
2. Radar / ARPA
3. ECDIS
4. GPS
5. Navtex
6. GMDSS panel
7. Steering gear test /Auto pilot / NFU
8. Sound signals test
9. Nav Lights test
10. VHF test in 16 and local port channel
11. Echo sounder
12. Doppler log
13. Main eng control panel
14. Eng telegraph
15. Alarms panel / PA
16. Entry in movement book and logkeeping

**USE OF BRIDGE EQUIPMENTS**

1. Operation
2. Significance in realtime in scenario
3. Calling stations F and A

**WATCHKEEPING**

**Open Sea**

1. Rule 5 Look out / Radar look out / Targets on radar / Vectors true/ rel
2. Position plotting / from GPS /sight calculations / By radar / terrestrial fix
3. Effect of Beam swell / wind waves / white horses n wind direction
4. Hand over and taking over a watch
5. Entry in log book after 4 hours navigational watch

**Restricted waters**

1. Dense traffic / position fixing frequency / position fixing aids /
2. Use of ARPA
3. Monitoring depth, soundings
4. Reporting to VRS / VTS
5. Shallow water effect (Effect of squat, turning circle)

**Pilotage**

1. Receiving a pilot / pilot flags / Entry in movement book
2. Master pilot info exchange / passage plan discussion
3. Understanding /repeating / executing pilots HELM n ENGINE orders
4. Position fixing under pilotage

**Restricted Visibility**

1. Lights n sound signals in restricted visiblity
2. Meaning of the term "Apparently forward of the beam"
3. Meaning of the term "Determined by radar alone, the presence of a target"
4. "Taking ALL way off"
5. Action to avoid collision in real time scenario
6. Log keeping

**HAND STEERING**

1. In open seas / restricted waters / under pilot (Both in Ballast and loaded conditions)
2. Steering a loaded ship (momentum, counter rudder)
3. Steering a loaded ship or ballast ship when engines are stopped (larger helm / frequent hardover)
4. Steering a light ship with strong winds on the bow, quarter, beam
5. Steering a light ship with strong currents on the bow, quarter, beam

**ACTION TO AVOID COLLISION**

1. Head on / Crossing / Overtaking / TSS / Both in clear visibility and restricted visibility
2. Vessel on port side / crossing / not taking action
3. Overtaking vessel gradually becoming a crossing vessel
4. Head on situation / Target vessel not taking action
5. Significance of understanding the meaning of true vectors / relative vectors
6. (increasing their lengths to see the CPA) in a collision avoidance situation

**CALLING MASTER**

1. Scenarios where the OOW shall call the master well in advance
2. Minimum of 5 scenarios would be simulated.

**TOTAL: 60h**

**TEXT BOOKS:**

University Study Materials
Course Objective:

- To understand the Human Values
- To understand the Engineering Ethics, sense of engineering ethics
- To understand the Human Safety Responsible and Rights

Course Outcome:

CO – 1: To understand the Morals, Values and Ethics
CO – 2: To be well versed with the introduction to Yoga and meditation for professional excellence and stress management
CO – 3: To understand the senses of Engineering Ethics
CO – 4: To understand how to use ethical theories
CO – 5: To be well versed with codes of ethics
CO – 6: To understand a Balanced Outlook on Law
CO – 7: To understand the assessment of safety and risk
CO – 8: To understand the Intellectual Property Rights (IPR)
CO – 9: To understand the Environmental Ethics
CO – 10: To understand the Computer Ethics

Syllabus:

UNIT – I HUMAN VALUES

UNIT – II ENGINEERING ETHICS

UNIT – III ENGINEERING AS SOCIAL EXPERIMENTATION
Engineering as Experimentation – Engineers as responsible Experimenters – Codes of Ethics – A Balanced Outlook on Law.
UNIT – IV SAFETY, RESPONSIBILITIES AND RIGHTS

UNIT – V GLOBAL ISSUES

Total: 60 Hrs

Text Books:

Reference Books:
SKILL ENHANCEMENT ELECTIVE COURSES
Course Objective:
- Explain the theory, construction, and operation of basic electronic devices
- Be exposed to basic electronic devices

Course Outcome:
CO – 1: To know about semiconductor
CO – 2: To understand the applications of diodes in rectifiers
CO – 3: To understand the basic principles of various semiconductor devices
CO – 4: To know the behavior and characteristics of various semiconductor devices
CO – 5: To know about the behavior and characteristics of BJT
CO – 6: To understand how the transistor acts as an amplifier and switch
CO – 7: To understand the principle of digital electronics
CO – 8: Compile the different building blocks in digital electronics using logic gates
CO – 9: To know about operational amplifier
CO – 10: To understand the applications of OPAMP

Syllabus:

UNIT – I SEMICONDUCTOR DIODES
Semiconductors—properties of semiconductor—Semiconductor materials—intrinsic, extrinsic types—diodes—p-n junction under forward bias and reverse bias condition—p-n junction in breakdown region—characteristics of a diode—rectifier circuits—half wave, full wave and bridge rectifier.

UNIT – II SEMICONDUCTOR DEVICES
Zener diode—working principle—characteristics—THYRISTOR—SCR—principle of operation—different modes of operation of SCR—voltage-current characteristics—commutation methods—VARISTOR—THERMISTOR—LED—DIAC—TRIAC

UNIT – III BIPOLAR JUNCTION TRANSISTOR
Transistors—construction—NPN—PNP—junctions—biasing the BJT—common base, common emitter, common collector configurations—principle of operation—characteristics—transistor as an amplifier—active region operation of transistor—transistor as a switch: cut-off and saturation modes

UNIT – IV DIGITAL ELECTRONICS
Number systems—decimal, binary, octal, hexadecimal—converting decimal to binary, octal to decimal, binary to octal, hexadecimal to decimal, binary to hexadecimal, hexadecimal to binary, hexadecimal to octal, binary arithmetic—binary addition, binary subtraction, binary multiplication, binary division—
complement of binary numbers-logic gates-AND gate, OR gate, NOT gate, NAND gate, XOR gate, NOR gate, X-NOR gate, half adder, full adder.

UNIT V INTRODUCTION TO OPERATIONAL AMPLIFIERS

OPAMP IC741- linear op-amp circuits- inverting and non-inverting OPAMP circuits, OPAMP applications: addition, subtraction, integration, differentiation, voltage follower- concept of differential amplifiers- common mode signal, differential mode signal.

Total: 60 Hrs

Text Books:

Reference Books:
Course Objectives:

- To understand the .NET framework class library
- To understand the Object Oriented Programming using VB.NET
- To understand how to use back end application with VB.NET

Course Outcome:

CO – 1: To understand why to use .NET?
CO – 2: To be well versed with the types of .NET Namespace
CO – 3: To be well versed with VB.NET data types
CO – 4: To understand the Decision Statements
CO – 5: To be well versed with Object Oriented Features
CO – 6: To understand the Error handling in procedures
CO – 7: To be well versed in Windows Application
CO – 8: To understand the MDI Forms
CO – 9: To be well versed in database technology
CO – 10: To be well versed with XML Data

Syllabus:

UNIT – I INTRODUCTION TO .NET
Why .NET?, The .NET framework Class Library, Working with the .NET FCL, Namespaces, Types of .NET Namespace

UNIT – II THE VISUAL BASIC .NET LANGUAGE
VB.Net Data types, Operators, Decision Statements- If..then, If.then..else, Select.. Case, Loop Statements- While, Do .. Loop, For .. Next, For Each ..Next, Arrays.

UNIT – III OOP USING VB.NET
UNIT – IV WINDOWS FORM

UNIT – V DATA ACCESS WITH ADO.NET

Overview of Microsoft Database Access Technology, ADO.Net, Creating a Database, ADO.Net Architecture, ADO.Net Class Libraries, Databound Controls, Creating a Data Set, Using XML Data.

Total: 60 Hrs

Text Books:
1. Visual Basic .NET The Complete Reference by Noel Jerke

Reference Books:
1. Visual Basic .NET Programming Black Book by Steven Holzner
Course Objective:

• To understand the Introduction to Programming Language
• To understand the concepts of OOPS
• To understand the concepts of C++, Exception Handling

Course Outcome:

CO – 1: To understand the introduction of OOPS
CO – 2: To be well versed with History of C and C++
CO – 3: To understand the Classes & Object with C++
CO – 4: To be well versed with the Rules of Overloading Operators
CO – 5: To understand the Inheritance
CO – 6: To understand the Virtual Functions
CO – 7: To understand how to use files in C++
CO – 8: To be well versed in Command Line Arguments in C++
CO – 9: To understand the Exception Handling
CO – 10: To be well versed with All Exception Handlers Throwing an exception from handler Uncaught Exception

Syllabus:

UNIT – I INTRODUCTION 12

UNIT – II CLASSES & OBJECTS, CONSTRUCTOR & DESTRUCTOR 12
Classes & Object - C++ Program with class Defining Member Functions, Making an Outside Function Inline, Nesting of Member Functions, Private Member Functions Arrays within a Class- Memory Allocation for ObjectsStatic Data Members, Static Member Functions, Arrays of Objects Object as Function Arguments, Friendly Functions, Returning Objects, Const member functions, Pointer to
UNIT – III INHERITANCE, POINTERS, VIRTUAL FUNCTIONS & POLYMORPHISM

- Inheritance - Defining Derived Classes, Single Inheritance, Making a Private Member Inheritable, Multilevel Inheritance, Hierarchical Inheritance, Multiple Inheritance, Hybrid Inheritance, Virtual Base Classes, Abstract Classes, Constructor in Derived Classes, Nesting of Classes, Pointer, Virtual Function & Polymorphism, Introduction, Pointer to Object, Pointer to Derived Class, Virtual Function, Pure Virtual Function, C++ I/O System Basics - C++ Streams, C++ Stream Classes, Unformatted I/O Operation, Formatted I/O Operation, Managing Output with Manipulators

UNIT – IV FILES, TEMPLATES, GENERIC FUNCTION

UNIT – V EXCEPTION HANDLING

- Exception handling - Exception Handling Fundamentals, The try Block, the catch Exception Handler The throw Statements, The try/throw/catch sequence Exception Specification Unexpected Exception Catch – All Exception Handlers Throwing an exception from handler Uncaught Exception.

Total: 60 Hrs

Text Books:

Reference Books:
Course Objective:

- To introduce the students to the investment and securities concepts.
- To explain the fundamental and technical analysis of portfolio

Course Outcome:

CO 01: To understand the Gambling and Investment
CO 02: To understand the Negotiable Securities and Non Negotiable Securities
CO 03: To understand the history of stock exchange in India
CO 04: To understand the functions of Stock Exchange
CO 05: To understand the functions of SEBI
CO 06: To understand the critical review of SEBI
CO 07: To understand the fundamental analysis
CO 08: To understand the economic analysis and Industry analysis
CO 09: To understand the Portfolio Construction
CO 10: To understand the Constant ratio plan and variable ratio plan

Syllabus:

UNIT – I INTRODUCTION

UNIT – II PRIMARY MARKET

UNIT – III SEBI AN OVERVIEW

UNIT – IV FUNDAMENTAL ANALYSIS

PORTFOLIO CONSTRUCTION

Portfolio Construction – Approaches in Portfolio construction – Determination of objectives – Selection of portfolio – Markowitz Model – The Sharpe Index Model – Capital Asset pricing model (CAPM) – Portfolio Revision – Formula plans – Assumptions, Constant rupee value plan – Constant ratio plan and variable ratio plan.

**Exercises:**

**Tools** : Familiarization  
(2 Hours)

**Fitting** : T, V, H Type Joints  
(6 Hours)

**Lathe** : Facing, Turning, Taper Turning  
(12 Hours)

**Welding** : BUTT, Lap, (Arc and Gas Welding), Gridding & Cutting Operations.  
(10 Hours)
Course Objective:

- To be well versed in how to apply various knowledge of architecture on ship operations.
- To Understand Ship Stability and Statical Stability

Course Outcome:

CO 01: To understand the types of Ships
CO 02: To understand the Stress and Strain in Ships in Still water and in Sea way
CO 03: To understand the principle part of Ships
CO 04: To understand the advantages of welding over riveting
CO 05: To understand the concept of law of floatation
CO 06: To understand the center of buoyancy and factors affecting the same
CO 07: To understand the Transverse Statical stability
CO 08: To understand the Equilibrium of Ship
CO 09: To calculate of List while Loading, Discharging and/or shifting weights, Correction of List
CO 10: To understand how to use of hydrostatic tables and curves as supplied to ships, Displacement/draft-curve and table, Light displacement& Load displacement

Syllabus:

**UNIT – I INTRODUCTION**

Types of Ships – Types of ships based on nature of cargo, Passenger Liners, Ferries, Specialized carriers for General Cargo, Bulk, Oil (Crude Oil Products) OBO’s. Container, Ro-Ro, Lash, LPG, LNG, Cattle Carrier, Car Carrier etc., Special features of above types of ships.

Definition and Meanings; LOA, LBP, EB MB, Extreme Depth, Molded Depth, Draft, Freeboard, Camber, Sheer, Rake, Rise of Floor, Flare, etc.

Stress and Strain in ships in Still water and in Sea way.

**UNIT – II PRINCIPLE PART OF SHIP**

Principle Parts of Ship: Bow, stern, Shell plating, Double Bottom Tanks, Cargo Holds, Tween Decks, Deep tanks, Fore-peak and After Peak store rooms and tanks, Plate Keels and Duct Keels. Forecastle deck, Quarter Deck, Main/Whether decks, Hatch covers, Cargo Gear, anchoring and mooring equipment, Mast House.
Machinery Spaces – Engine Room Layout, Engine Casing, Subdivisions of Engine Room, Steering Gear, Pump Rooms, Mast houses, Work-Shops etc.

Super structure – Wheel House, Accommodation spaces, Cabins, Galley, Pantry, Dining Saloons, Recreation Rooms, Various Stores and Lockers Cold storage spaces etc.

General Layout of ships – General Cargo Ship, Bulk Carrier, Oil Tanker, container Ship, Passenger ship, RO ship, Chemical Tanker, Gas Tanker, Combination Carrier. Sketches of these ships.

UNIT – III LAWS OF FLOTATION
Laws of flotation, Buoyancy, Reserve buoyancy, Displacement, Dead weight, Change of draft due to change of density.

Tonnes per Cm. Immersion (TPC), Fresh water allowance (FWA), Dock Water Allowance (DWA), Calculations of TPC, and FWA & DWA in various densities.

The meaning of the terms Block co-efficient, water plane co-efficient, Mid-Ship Coefficient, Prismatic Coefficient and relationship between them

The center of gravity of ship and factors affecting the same. Calculation involving KG of a ship

The center of buoyancy and factors affecting the same. Calculation involving KB of a ship.

Use of displacement and TPC curves and scales to determine weights of cargo or ballast form draughts or freeboards.

UNIT – IV TRANSVERSE STATICAL STABILITY

Equilibrium of ships: Stable, Unstable and Neutral equilibrium.

Free Surface effect: Free Surface effect, Effect of Slack Tanks on stability and its Calculations, Calculation of GM (fluid), Stiff and Tender ships.

Curve of Statical Stability; Cross curves of Stability.

UNIT – V LIST AND HYDROSTATIC PARTICULARS
List: Difference between and list heel, List and its corrections, Calculation of List while Loading, Discharging and/or shifting weights, Correction of List. Numerical involving above.

Hydrostatic curves and tables: Use of hydrostatic tables and curves as supplied to ships, Displacement/draft-curve and table, Light displacement& Load displacement
Total: 60 Hrs
