

Major Research Projects completed by Dr. R. Dinakaran Michael

Project title	Funding Agency	Total Cost (INR)	Duration	Place of Work	Status
Immuno-prophylactic and therapeutic potentials of the hemi-parasitic mistletoe, <i>Dendrophthoe falcata</i> (Ettingsh) for application to disease control in Asian Seabass, <i>Lates calcarifer</i>	Dept of Biotechnology India	40 Lakhs	2013-17	Vels University	Completed
Immunostimulatory, antibacterial and disease protective active principles from selected marine macroalgae for application to aquaculture	Ocean Atmospheric Science and Technology Cell (MoES)	13.2 Lakhs	2008-11	Vels University	Completed
Studies on the Immune responses of the Striped murrel, <i>Channa striatus</i>	Dept of Science and Technology	24 Lakhs	2008-11	Vels University	Completed
Development of Immunostimulant(s) from <i>Nyctanthes arbor-tristis</i> for application in Aquaculture	University Grants Commission	10.3 Lakhs	2005-08	Lady Doak College	Completed
Isolation of Immunostimulatory and anti bacterial active principles from selected plants for application medicinal in finfish aquaculture	Dept of Biotechnology India	20 Lakhs	2003-06	Lady Doak College	Completed
Immunological indicators of stress/pollution and of disease outbreak in Indian finfish aquaculture	Volkswagen Foundation, Germany	40 Lakhs	2001-04	Lady Doak College/ Hannover Vet. Varsity Germany	Completed
Development of Fish Vaccines against <i>Aeromonas hydrophila</i> infection	Dept of Biotechnology India	10 Lakhs	1994-98	The American College	Completed
Studies on immunity in the tilapia, <i>Oreochromis mossambicus</i> Peters	United Board, New York, USA	3 Lakhs	1990-92	The American College	Completed
